Please contact your preferred Weha distributor for pricing and ordering. We will be happy to help you find your local Weha distributor. Visit [www.wehausea.com](http://www.wehausea.com) for product and technical information. For technical information and distributor information you can also contact your regional sales manager.

# DIAMOND BLADES

## Weha White Lion Quartzite Diamond Bridge Saw Blade

Weha has built this Quartzite Bridge saw blade specifically to cut quartzite stone. But it also does awesome on granite and engineered stone. The Segment is designed with Layered ARIX technology to give high diamond concentration and continuous diamond contact with the stone. The bond matrix is specifically for quartzite, quartz, granite, and engineered stone.

**BEST  
QUARTZITE  
BLADE**

- » Layered Arrix technology
- » Increased cutting speed
- » German Silent Core
- » 60mm arbor

**Also available for  
Denver & Donatoni  
Bridge Saws.**

Part #	Description
128903	14" x 20mm White Lion Quartzite Bridge Saw Blade
128904	16" x 20mm White Lion Quartzite Bridge Saw Blade
128906	18" x 20mm White Lion Quartzite Bridge Saw Blade
128908	20" x 20mm White Lion Quartzite Bridge Saw Blade
128909	24" x 20mm White Lion Quartzite Bridge Saw Blade

## Weha Matrix S Diagonal Diamond Bridge Saw Blade

The Weha Matrix S is a premium layered diamond blade designed to cut fast, clean and quiet. Unlike other layered blades, the Weha Matrix S diamonds are layered at a diagonal to the core. This allows 100% continuous cutting. Other layered diamonds have a layer of diamond and a layer of filler, then another layer of diamond. Because of the continuous layer of diagonal diamonds, the Weha Matrix S 18mm height will last as long as other 20-25mm height blades.

- » Diagonal layered diamond
- » 18mm lasts as long as 25mm
- » For all horsepower saws
- » 14" excellent on CNC saw jets
- » Austrian segment
- » German Silent Core
- » 60/50 arbor

Part #	Description
VZ051412	12" Weha Matrix S 12"x60/50x18mm SC Blade
VZ051413	14" Weha Matrix S 14"x60/50x18mm SC Blade
VZ051414	16" Weha Matrix S 16"x60/50x18mm SC Blade
VZ051468	18" Weha Matrix S 18"x60/50x18mm SC Blade

## Weha Red Cat Diamond Bridge Saw Blade

The Weha Red Cat Diamond Bridge Saw Blade is a steady running blade for granite, quartz, marble, and even quartzite. This silent core bridge saw blade is great for doing 45° miters with no deflecting. The Red Cat will cut clean with very little chatter or chipping and will cut all the way to the core to get maximum life out of the blade!

- » 3.3mm thick segment
- » 15mm diamond segment height
- » 60/50 arbor

Part #	Description
71414	14" x 15mm Red Cat Diamond Bridge Saw Blade
71416	16" x 15mm Red Cat Diamond Bridge Saw Blade
71418	18" x 15mm Red Cat Diamond Bridge Saw Blade

# DIAMOND BLADES

## Weha Keramik-Dekton® Blade

The Weha Keramik Dekton® Blade has been engineered specifically for cutting 2cm and 3cm Dekton® and other ceramic, porcelain sintered stone slabs. The Weha Keramik blade bond and blade design is uniquely made to provide clean, chip free cuts while providing a faster cut on these extremely hard and brittle surfaces.

Part #	Description
128583	14" Weha Keramik-Dekton Blade
128584	16" Weha Keramik-Dekton Blade
128585	18" Weha Keramik-Dekton Blade

- » 10mm height segment
- » 60/50 arbor
- » Recommended for 10hp+ saws

## Weha Grey Leopard Miter Blade

Weha Grey Leopard is a free cutting high diamond concentration made specifically for Miter Cuts on granite, marble, quartz, quartzite materials. The "Stiff Core" blade is made with a specific silent core designed specifically for miter and angle cuts. This gives much greater accuracy on miter cuts. Of course, this will work perfectly well on standard straight bridge saw cuts as well. The Grey Leopard Stiff Core diamond segment is an ARIX matrix diamond technology with a 20mm x 20mm dual landing segment. This segment design pulls out the slurry faster, improving diamond cutting speed and clean miter and straight cuts.

Part #	Description
138151	14" Weha Grey Leopard Miter Blade
135350	16" Weha Grey Leopard Miter Blade
137682	16" Weha Grey Leopard 400mm with 4.5mm reinforced core
136910	18" Weha Grey Leopard Miter Blade

- » Made for miter cuts
- » Quartzite, quartz, granite, marble
- » Excellent for straight cuts
- » Dual Landing Segment design for fast cutting

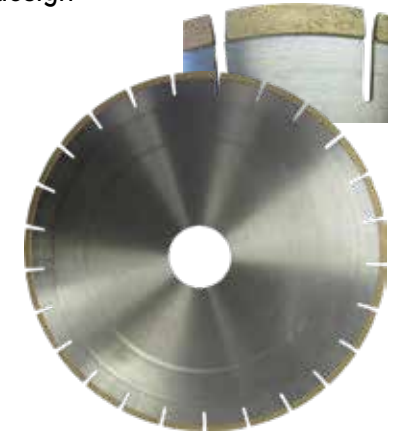

## Weha Marble Bridge Saw Blade

Weha Marble Diamond Bridge Saw Blades were made specifically for cutting marbles, limestones, travertines, onyx materials, cultured marble, etc

Weha Marble Diamond Bridge Saw Blades offer a chip free cut, smooth finish, and excellent life. This Marble diamond Bridge Saw blade is designed for 3 hp and up bridge saws. Best bridge saw blade for cutting marble.

Part #	Description
5350021	Weha 14" Marble Bridge Saw Blade
5400021	Weha 16" Marble Bridge Saw Blade

- » 7mm x 60mm arbor
- » 25 segments
- » Silent Core

## Weha Low Horsepower 14" Bridge Saw Blade

Weha Low Horse Power Diamond Saw Blades are made specifically for rail saws, track saws, and tile saws that have a 3hp or less motor.

The Weha Low Horse Power Diamond Saw Blade have a total outside diameter of 13 7/8". This diameter allows it to fit on the Blue Ripper rail saw and inside other saws with a 14" blade housing.

Part #	Description
7615	Weha Low Horsepower 14" Bridge Saw Blade

- » Total Diameter: 13 7/8" 60mm arbor
- » 10mm height segment

# DIAMOND BLADES

## Weha Blitz Ultra Premium Quad Turbo Diamond Blade

Weha 5" Blitz Ultra Premium Quad diamond turbo blades were specifically made to exceed quality, performance, life, and expectations of other premium grade blades that are on the market today. Based upon real life fabricator feedback, life expectancy is between 100-130 linear feet of cut. This includes both shop and install use. Designed with air cool holes to stay cool for continuous cutting. The Blitz blade comes with a solid stiff core which will not deflect, bend, or flex during the cut.

Part #	Description
51415	5" Weha Blitz Ultra Premium Quad Turbo Diamond Blade
51416	6" Weha Blitz Ultra Premium Quad Turbo Diamond Blade
51417	7" Weha Blitz Ultra Premium Quad Turbo Diamond Blade

- » Dry use
- » May be used wet
- » 7/8"-5/8" - 22x8mm Quad Holes
- » 5" & 6" available with clamshell

## Weha ST Side Cut Quad Turbo Blade

Weha ST Side Cut Quad blades are ultra premium turbo blades designed for granite, marble, ceramic materials. The Weha ST blade is extremely aggressive in cutting but leaves the stone super smooth because of the side diamonds. Designed with air cool holes to stay cool for continuous cutting. Strong core for grinder use.

Part #	Description
51460	5" Weha ST 5" x Dia x 7/8"-5/8"x10mm Quad Holes
51461	6" Weha ST 6" x Dia x 7/8"-5/8"x10mm Quad Holes
51462Q	7" Weha ST 7"x Dia x 7/8"-5/8"x10mm Quad Holes
51463	10" Weha ST Chop Saw Compound Miter Saw Diamond Blade
51464	12" Weha ST Chop Saw Compound Miter Saw Diamond Blade

- » Dry use
- » May be used wet

## Weha Red Cat Turbo Blade

Weha Red Cat Turbo granite blades are one of the best granite, quartz, and Engineered Stone blades for the price. The Red Cat quartz blades are going to cut fast, sinking into the stone with ease. The simple weight of the grinder is enough to make them cut through granite and quartz stone easily. With a full 8mm of diamond and tight narrow turbo diamond segments allow clean, fast cuts and a lot of life.

Part #	Description
71405	Weha 5" Red Cat Diamond Turbo Blade
71406	Weha 6" Red Cat Diamond Turbo Blade

- » 4 Quad Core holes
- » 7/8"- 5/8" arbor
- » 8mm diamond rim
- » May be used wet or dry

# DIAMOND BLADES

## Weha White Lion Quartzite Diamond Turbo Blade

The Weha White Lion Diamond Turbo Blade was made specifically for cutting very hard materials such as quartzite, engineered stone, quartz, as well as granite.

Made with the very high diamond content and a bond to keep sharp, the Weha White Lion Quartzite Turbo Blade will cut fast and clean

The Weha White Lion Bridge Saw blade sets the standard in Quartzite cutting. Now get the same high quality cuts in a turbo blade.

If you are looking for one blade to fabricate anything that comes through the fabrication shop, whether its marble, granite, quartz, Quartzite, Engineered Stone, or any other stone, The Weha Quartz and Quartzite turbo blade will cut it.

The Weha White Lion Quartzite Turbo Blade can be used wet or dry in all materials.

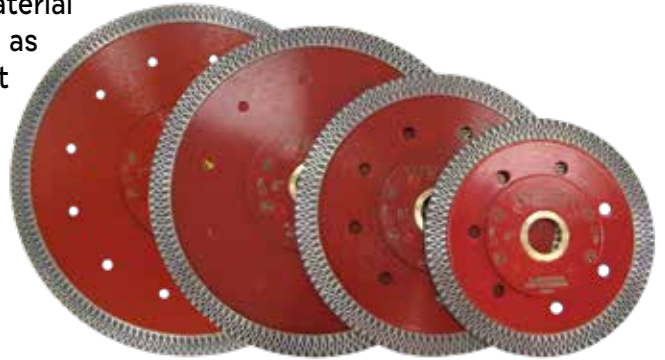

Part#	Description
128900	Weha 5" White Lion Diamond Turbo Blade
128901	Weha 6" White Lion Diamond Turbo Blade

- » Use for wet and dry cutting
- » 10mm high diamond rim for maximum life expectancy
- » 7/8" x 20-5/8" 4 Pin quad holes for quad adapters

## Weha Ceramica R-Mesh Turbo Blade

Weha Ceramica Thin Cut Turbo blade is an extra thin blade designed to cut Lapitec®, Dekton®, Neolith®, fast and extremely clean. The special Weha turbo design will remove the material rapidly and cleanly and providing maximum air to keep the blades as cool as possible when used dry. This produces a super clean cut with absolute minimal chipping.

Because the blade is only 1.2mm thick, the blade cuts ceramic, porcelain, granite, engineered stone, quartzite cleaner than any other turbo blade on the market.

Part#	Description
PBM4	Weha 4" R-Mesh Turbo Blade
PBM5	Weha 5" R-Mesh Turbo Blade
PBM6	Weha 6" R-Mesh Turbo Blade
PBM7	Weha 7" R-Mesh Turbo Blade

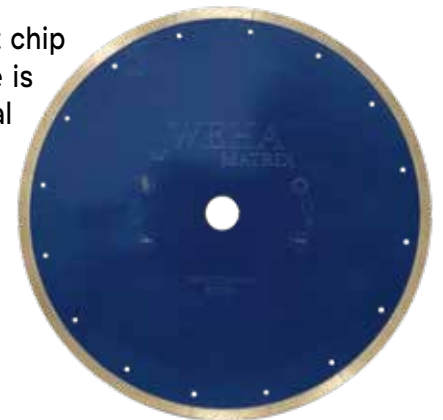

- » Use for wet and dry cutting
- » 7/8" x 5/8"
- » Max RPM 12,200

## Weha Matrix 12" Diamond Continuous Rim Blade

Weha Blitz 12" x 1" Arbor Continuous Rim Reinforced Core Blade is designed to cut chip free, fast, and provide excellent life due to high diamond concentration. This blade is designed specifically for cutting natural stone, engineered stone and quartz material with glass. With the Reinforced core, the blade is outstanding for miter cuts.

- » Wet cutting only
- » Chip free cutting
- » Excellent on natural stone
- » Chip free on glass material
- » Excellent with mosaic tile

Part #	Description
51525	Weha Blitz 12" Diamond Continuous Rim Blade Reinforced Core

## Weha Continuous Rim Blade

Weha Continuous Rim Blades are designed to cut chip free, fast, and provide excellent life due to high diamond concentration. This blade is designed specifically for cutting natural stone and glass.

Part #	Description
51509	8"x1"x7mm Continuous Rim
51510	10"x1"x20mm x 7mm Continuous Rim
51511	12"x1"x20mm x 8mm Continuous Rim

- » Premium quality
- » Excellent on natural stone
- » Chip free on glass material
- » Excellent with mosaic tile

## Weha Vacuum Brazed Marble Blade

Weha Vacuum Brazed Marble Blade is designed specifically to work on marble, limestone, travertine, and other soft stones for a virtual chip free cut.

Part #	Description
5125090	Weha 5"x 7/8" Vacuumed Brazed Marble Blade

- » New patented Vacuum Brazing Technology
- » Drastically longer life
- » Extremely fast, aggressive cut
- » Outstanding on all marble, limestone, travertine, etc.

## Weha Copper Core Continuous Rim Blade

Weha Copper Core continuous rim diamond blade for ceramic, porcelain, glass, and natural stone tile such as granite, marble, travertine, limestone, etc. Weha Copper Core Diamond Blade is made to pull the heat from the blade extending life and making a near perfect cut.

Weha Copper Core diamond blade is made with a special bond that can cut glass, porcelain, and stone with no chipping.

Part#	Description
51550	Weha 4" Copper Core Continuous Rim Blade 22-20mm arbor
51551	Weha 6" Copper Core Continuous Rim Blade 22-20mm arbor
51552	Weha 8" Copper Core Continuous Rim Blade 1" arbor
51553	Weha 10" Copper Core Continuous Rim Blade 1" arbor
51554	Weha 12" Copper Core Reinforced Continuous Rim Blade 1" arbor
51555	Weha 14" Copper Core Reinforced Continuous Rim Blade 60mm arbor

- » Extremely fast, aggressive cut
- » Outstanding on all marble, limestone, travertine, etc.

# DIAMOND BLADES

## Weha 5" White Lion Contour Blade

The Weha 5" White Lion Contour Blade is a high diamond concentrated Contour Blade made for cutting out bowls, radius, and circular cut outs in quartzite, granite, quartz, marble, concrete counter tops, etc. The White Lion 5" Contour Blade is made from the same bond as the White Lion Quartzite, Quartz, Granite Turbo Blades that work incredibly well and cut like butter in all materials. The White Lion 5" contour blade is one contour blade for all stone that runs through the shop.

The White Lion Contour blade can be used wet or dry in all stone, including quartzite and quartz.

Part#	Description
5346	Weha 5" White Lion Contour Blade

## 5" Weha Matrix Turbo Contour Blade with Side Diamond Cutting

The Weha 5" Turbo Contour Blade with Side Diamond Cutting is a fast cutting, no vibration contour blade. The side diamonds extends a full 1 3/8" down the blade, assuring the side diamonds will cut completely through 3cm material. Ultra grade diamonds, strong core steel, speed, life, no vibration, smooth running, cutting to the line. This is what makes the Weha Matrix Turbo Contour Blade one of the best diamond contour blades, hands down. Due to the quantity and quality of the full 8mm of turbo diamond segments around the rim of, life of the Weha turbo contour blade will out perform other contour blades in this style design.

Part #	Description
50505	5" Weha Matrix Contour Blade 5"x7/8" - 5/8"
50506	6" Weha Matrix Contour Blade 6"x7/8" - 5/8"

## Weha 5" Ultradunn Thin Blade

Weha Ultradunn Turbo Blade is an extra thin blade designed to cut Lapitec® & Dekton® very fast with a very clean chip free finish. Excellent for cut outs.

Part #	Description
512250	Weha 5" Ultradunn Thin Blade

## Weha Diamond Turbo Rodding Blades

Weha Diamond Turbo Rodding Blade for granite, marble, engineered stone, quartz, quartzite, concrete counter tops. The Weha Diamond turbo rodding blade is designed to increase speed in cutting out the rodding channel for the 1/8" thick fiberglass and metal rods. With a full 10mm height of diamond and cooling holes, the Weha Turbo Rodding Blade cuts as fast as a turbo blade but making a 1/4" wide square notch for the rods.

The Granite Rodding Turbo Blade makes up 2 Weha EB blades separated by an 1/8" thick of metal-all welded together.

When the blade is cutting, it blows out the stone that goes between the blades, leaving a perfect 1/4" wide groove.

Part#	Description
50287	Weha 4" x 1/4" Diamond Turbo Rodding Blade
50289	Weha 5" x 1/4" Diamond Turbo Rodding Blade

## Weha 10" (250mm) x 5mm Rodding Blade

Weha 10" x 5mm Rodding Blade is made for saws, such as the GMM, that has Rodding capabilities.

Can be used for making rodding slots on granite, marble, quartz, quartzite.

Part#	Description
107880	Weha 10" (250mm) x 5mm Rodding Blade

## Weha Duo Marble Blade

- » Diamonds on both sides
- » 2 blades in one
- » Flip it over for a new blade
- » Smooth grinding, no chipping
- » Comes with quad adapter
- » Use as a blade
- » Use a cupwheel
- » May be used wet or dry

Part #	Description
51071	5" Weha Duo 4.5"x7/8"-5/8"x10mm with Adapter

## Weha Quad Adapters 5/8-11 Threads

Weha offers 2 quad adapters for your use. Brass adapters are very durable and will last a very long time. Aluminum adapters work very well and light in weight. Both adapters fit practically all blades made for the USA market. Both adapters come with 4 flush mount screws.

Part #	Description
VZ051054	Aluminum Quad Adapter with Screws
VZ051055	Brass Quad Adapter with Screws

# DIAMOND POLISHING PADS

## Weha Blitz Diamond Polishing Pad

The Weha Blitz Geo Pattern pads are made with high concentration of diamond into each grit, allowing the pad to create a high gloss finish with the speed that other diamond polishing pads can't achieve. These Blitz 7 step pads will polish granite, engineered stone, quartz, and quartzite stone faster than other advertised 5, 6 and 7 step pads, with a much richer, deeper polish. Extreme flexibility and 3mm thick, the Weha Blitz are touted as one of the best premium granite and stone polishing pads on the market.

- » 3mm thick
- » No outer segment loss
- » Super quick polishing
- » Extremely flexible

Part #	Description
13450	4" Weha Blitz Diamond Polishing Pad 50 grit
134100	4" Weha Blitz Diamond Polishing Pad 100 grit
134200	4" Weha Blitz Diamond Polishing Pad 200 grit
134400	4" Weha Blitz Diamond Polishing Pad 400 grit
134800	4" Weha Blitz Diamond Polishing Pad 800 grit
1341500	4" Weha Blitz Diamond Polishing Pad 1500 grit
1343000	4" Weha Blitz Diamond Polishing Pad 3000 grit
1345000	4" Weha Blitz Diamond Polishing Pad 5000 grit

## Weha Quartz Diamond Polishing Pads

The Weha Quartz diamond polishing pads with the Geo Pattern pads are made with high concentration of diamond into each grit, allowing the pad to create a high gloss finish with the speed that other diamond polishing pads can't achieve. Weha Quartz Engineered Stone (ES) Diamond Polishing Pads were made with white resin designed specifically to eliminate all bleeding on quartz, engineered stone materials. However, these premium pads will also work outstandingly on all granite and quartzite stones as well.

Weha has tested these Quartz diamond polishing pads on practically every material made: Silestone (by Cosentino), Zodiaq, Cambria, Caesar Stone, Santa Margherita, LG, Breton materials, and more. The results? Weha Quartz diamond polishing pads create a perfect polish match on these stones.

Part #	Description
16450	Weha 4" ES Polishing pad 50 grit
164100	Weha 4" ES Polishing pad 100 grit
164200	Weha 4" ES Polishing pad 200 grit
164400	Weha 4" ES Polishing pad 400 grit
164800	Weha 4" ES Polishing pad 800 grit
1641500	Weha 4" ES Polishing pad 1500 grit
1643000	Weha 4" ES Polishing pad 3000 grit

- » 3mm thick
- » No outer segment loss
- » Highest diamond concentration for polishing pads
- » Extremely flexible
- » Work excellent of granite and natural stones also
- » Also available in 5"

# DIAMOND POLISHING PADS

## Weha Trio 3 Step White Hybrid Diamond Polishing Pads

The Trio 3 Step Diamond Polishing Pads really work. The Trio pads are packed with premium diamond and resin that are made to work exceptionally well on light and dark quartz, all engineered stone, as well as granite and quartzite.

Weha Trio 3 Step Polishing Pads are 3mm thick for a full matrix of diamonds. The edges around the pad are rounded allowing the pad to easily glide across the stone, especially inside bowls, ogees, and tighter radius profiles.

The Trio White Hybrid resin bond will not bleed or leave resin marks on light or dark quartz or any stone. Weha has designed the Trio to be the best 3 step diamond polishing pads for quartz, granite, and quartzite.

- » 3mm thick
- » Super flexible
- » Max RPM 4500

Part #	Description
13341	4" Weha Trio 3 Step Diamond Polishing Pad Step 1
13342	4" Weha Trio 3 Step Diamond Polishing Pad Step 2
13343	4" Weha Trio 3 Step Diamond Polishing Pad Step 3

## Weha Trilogy 3 Step Diamond Polishing Pads - Wet/Dry

Weha Trilogy 3 Step Diamond polishing pads are the absolute best polishing pads specifically for black, brown, gray, engineered stone, quartz stone. But they are equally as good on Black Absolute, Baltic Brown, Uba Tuba, and other dark granites and marbles. Additionally, they work amazing on light colored engineered stone, quartz, granite, marble, as well with zero bleeding. Absolutely perfect for Silestone, Cambria, Caesarstone, Zodiaq, Santa Margherita, and all other quartz surfaces. So many fabricators are using 5 step or 7 step pads to match the polish on these dark quartz materials. Now with the Weha Trilogy, 3 pads and THAT'S IT! Not 3 steps and buff. Not 3 steps and 1 more. 3 steps and put it on the truck.

Part #	Description
13361	4" Weha Trilogy POS 1
13362	4" Weha Trilogy POS 2
13363	4" Weha Trilogy POS 3

# DIAMOND POLISHING PADS

## Weha 3 Step Hybrid - Wet/Dry

Weha 3-Step Polishing pads were built with quality, performance, and speed

as its driving force. Weha wanted the fabricator to cut their polishing process in half the steps, saving 50% labor, doubling production, while improving the quality of the polish. Weha 3-Step pads have fully achieved this with results that have to be experienced to believe.

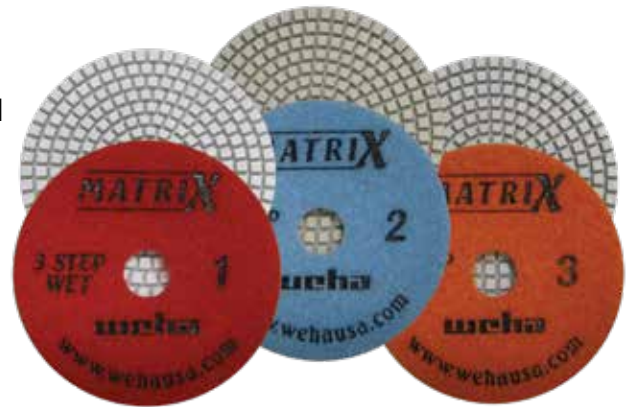

Part #	Description
13347	3" Weha 3 STEP Hybrid POS 1
13348	3" Weha 3 STEP Hybrid POS 2
13349	3" Weha 3 STEP Hybrid POS 3
13351	4" Weha 3 STEP Hybrid POS 1
13352	4" Weha 3 STEP Hybrid POS 2
13353	4" Weha 3 STEP Hybrid POS 3
13350	4" Weha 3 Step Hybrid Set of 3
13355	5" Weha 3 Step Hybrid POS 0
13356	5" Weha 3 Step Hybrid POS 1
13357	5" Weha 3 Step Hybrid POS 2
13358	5" Weha 3 Step Hybrid POS 3

- » 3mm thick
- » Super flexible
- » Use wet OR dry on granite
- » Use wet OR dry on marble
- » Use wet on engineered stone
- » Max RPM: 4500

## Weha Matrix 3 Step Diamond Polishing Pads

Weha Matrix 3 Step Diamond Polishing Pads are a 3 step polishing pad for granite, quartz, engineered stone, hard marbles. Weha Matrix 3 Step pads are an economical 3 step system that will give a good polish on granite and quartz materials, especially for the medium dark to light stone.

The Matrix 3 step are made with white resin that will not burn or leave resin marks on the stone or quartz materials.

Part #	Description
50451	4" Weha Matrix 3 Step Diamond Polishing Pad POS 1
50452	4" Weha Matrix 3 Step Diamond Polishing Pad POS 2
50453	4" Weha Matrix 3 Step Diamond Polishing Pad POS 3

## Weha EZ3 3 Step Diamond Polishing Pads

Weha EZ3 3 Step Diamond Polishing Pads are a 3 step polishing pad for granite, quartz, quartzite, engineered stone, hard marbles. the EZ3 3 step diamond polishing pads work well on all materials

The Weha EZ3 3 step pads are flexible, cuts and polishes fast, and still offers good life. The EZ3 3 Step Diamond Polishing Pads were built to achieve a good polish on medium to light colored granite, quartz, and engineered stone materials.

For the price, you can't beat the EZ3 3 step pads.

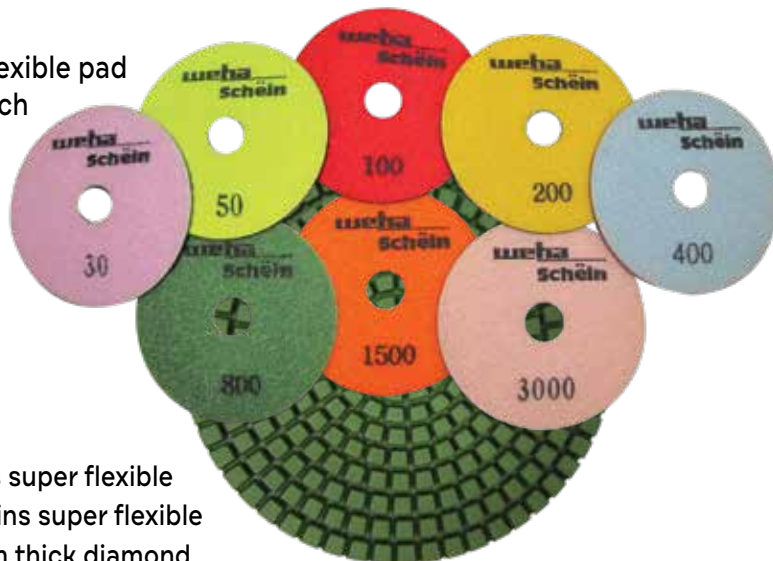

Part #	Description
60451	4" Weha EZ3 3 Step Diamond Polishing Pad POS 1
60452	4" Weha EZ3 3 Step Diamond Polishing Pad POS 2
60453	4" Weha EZ3 3 Step Diamond Polishing Pad POS 3

# DIAMOND POLISHING PADS

## Weha Schein Polishing Pads - Wet

The Weha Schein pads are a full 3.4mm thick! This very flexible pad will polish quickly, leave a brilliant polish, and will last much longer than standard polishing pads. Perfect for granite, hard marbles, engineered stones. Great pad at a great price! When compared to other polishing pads in their price range, the Schein will out flex, out polish, and out Schein the competition!

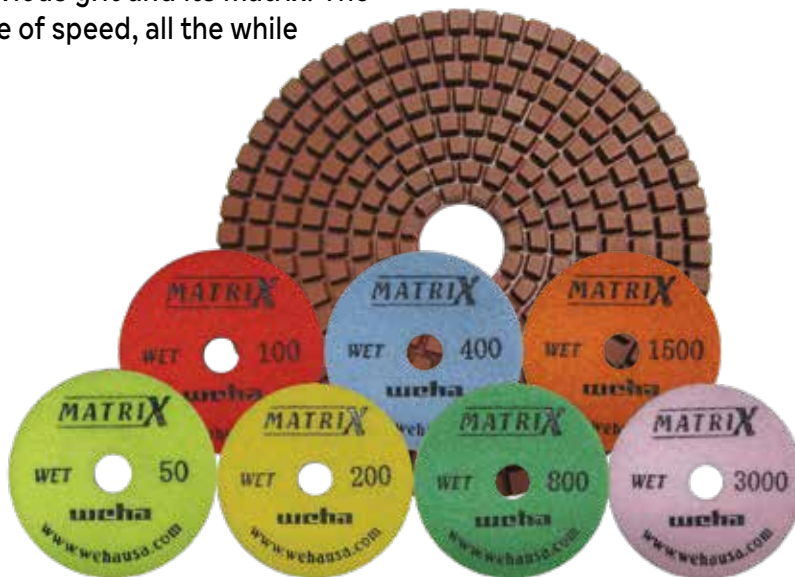

- » Starts super flexible
- » Remains super flexible
- » 3.4mm thick diamond
- » Up to 5000 RPM

Part #	Description
11350	3" Weha Schein Polishing Pad 50 grit
113100	3" Weha Schein Polishing Pad 100 grit
113200	3" Weha Schein Polishing Pad 200 grit
113400	3" Weha Schein Polishing Pad 400 grit

1153000	5" Weha Schein Polishing Pad 3000 grit

## Weha Matrix 7 Step High Production Polishing Pads - Wet

Weha threw out the conventional way 7 step granite diamond polishing pads were made and started from scratch. Weha took each individual grit and customized that diamond matrix to do one of several things: cut faster, last longer, soften the bond, make the bond harder, make them more aggressive, a little finer bond, etc. We then synchronized the entire 7 step sequence so that each grit complimented the previous grit and its matrix. The end result is achieving a perfect polish, at the fastest rate of speed, all the while maximizing the life the pads.

Part #	Description
50401	4" Matrix Wet Polishing Pad 50 grit
50402	4" Matrix Wet Polishing Pad 100 grit
50403	4" Matrix Wet Polishing Pad 200 grit
50404	4" Matrix Wet Polishing Pad 400 grit
50405	4" Matrix Wet Polishing Pad 800 grit
50406	4" Matrix Wet Polishing Pad 1500 grit
50407	4" Matrix Wet Polishing Pad 3000 grit
50400	4" Matrix Wet Polishing Pad Set of 7

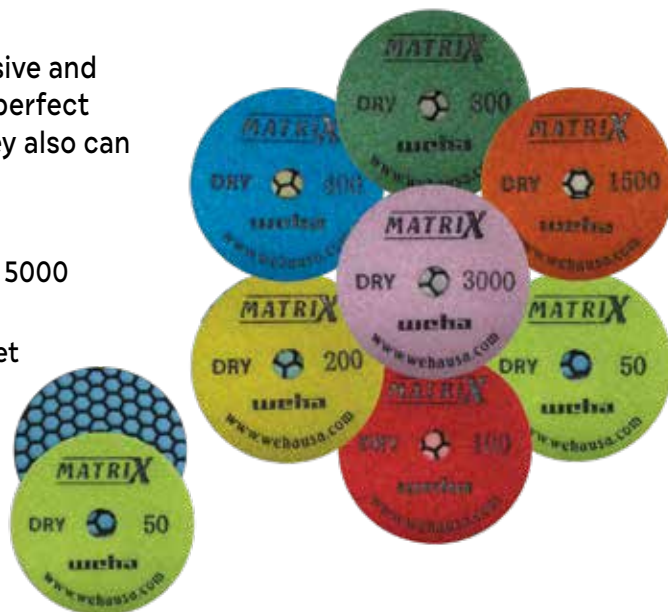

# DIAMOND POLISHING PADS

## Weha Matrix 7 Step - Dry- Matte Finish

The Weha Matrix Matte finish dry pads were made to be aggressive and polish right out of the gate. These quality dry pads will create a perfect polish on granite, marble, quartzite, and other natural stone. They also can be used wet on all these materials as well as engineered stone.

Part #	Description
50408	4" Matrix Dry Polishing Pad 50 grit
50409	4" Matrix Dry Polishing Pad 100 grit
50410	4" Matrix Dry Polishing Pad 200 grit
50411	4" Matrix Dry Polishing Pad 400 grit

# DIAMOND POLISHING PADS

## Weha 3 Step Triad Dry Polishing Pads

Weha Triad 3 Step Dry Diamond Polish Pads are for granite, marble, quartzite and all natural stone. The new triangular pattern allows for the maximum amount of diamond to be ceramic crystal coated. This offers the most utilized concentrated diamond possible. Also, this triangular design deflects and releases the maximum amount of heat keeping the ceramic bond 20-30% cooler than other designed dry diamond polishing pads. The special backing are designed to be extremely durable, does not release the diamonds and offers amazing flexibility.

Part #	Description
13371	Weha 4" Triad Polishing Pads Step 1
13372	Weha 4" Triad Polishing Pads Step 2
13373	Weha 4" Triad Polishing Pads Step 3

- » Max RPM 6000
- » May be used on granite, marble, quartzite, natural stone - wet or dry
- » Engineered stone, quartz stone - wet only

## Weha 4" 5 Step Dry Diamond Polishing Pads

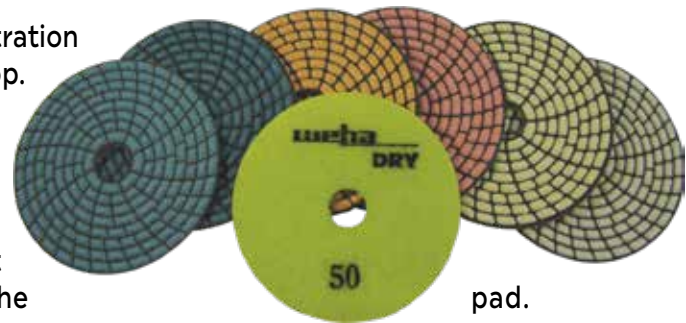

Weha 5-Step Dry Diamond Polishing pads are for polishing granite, marble, concrete and all natural stones. Made from the latest multi-diamond matrix bond technology. Only 5 diamond polishing pads are needed to create the best dry polish.

Part #	Description
D5S41	Weha 4" 5 Step Dry Diamond Polishing Pad Step 1
D5S42	Weha 4" 5 Step Dry Diamond Polishing Pad Step 2
D5S43	Weha 4" 5 Step Dry Diamond Polishing Pad Step 3
D5S44	Weha 4" 5 Step Dry Diamond Polishing Pad Step 4
D5S45	Weha 4" 5 Step Dry Diamond Polishing Pad Step 5
D5S4SET	Weha 4" 5 Step Dry Diamond Polishing Pad Set of 5

## Weha Spiral Brick Dry Polishing Pads

Weha Spiral Brick dry polishing pads are premium diamond concentration pads designed to be used both on the job site as well as in the shop. With more diamond content, these dry pads polish faster, last longer than standard dry pads with a brilliant polish, and still remain

Part #	Description
DPS450	Weha 4" Spiral Brick Dry Pad 50 grit
DPS4100	Weha 4" Spiral Brick Dry Pad 100 grit
DPS4200	Weha 4" Spiral Brick Dry Pad 200 grit
DPS4400	Weha 4" Spiral Brick Dry Pad 400 grit
DPS4800	Weha 4" Spiral Brick Dry Pad 800 grit

DPS43000	Weha 4" Spiral Brick Dry Pad 3000 grit
DPS4SET	Weha 4" Spiral Set of 7 50-3000 grit

extremely flexible throughout the life of the pad. They will create the same high quality polish as 7 step wet pads.

- » May be used wet or dry
- » Premium quality
- » Super flexible
- » Up to 5000 RPM
- » Incredible polish

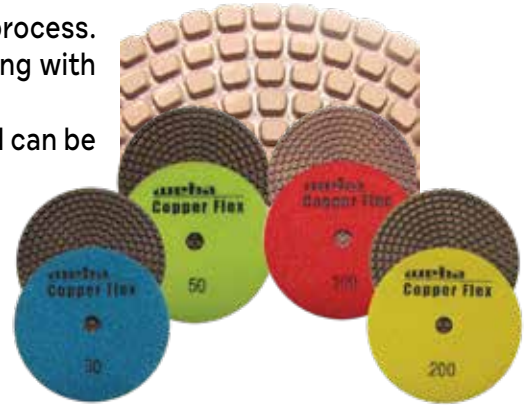

# DIAMOND POLISHING PADS

## Weha Copper Flex Diamond Polishing Pads - Wet/Dry

Copper Flex polishing pads are copper bonded diamond polishing pads that are designed to last longer than resin bond diamond polishing pads. These polishing pads are designed for fast stock removal and can be used with various materials including granite, marble, concrete and engineered stone.

Use the Copper Flex wet polishing pads to shape and start the polishing process. After that, simply switch to the standard resin bond wet polishing pads starting with a 400 grit to complete the polishing process. It is as simple as that.

These copper pads are 3mm thick yet, flexible. Since they are flexible, they can be used for radius and bowl polishing.

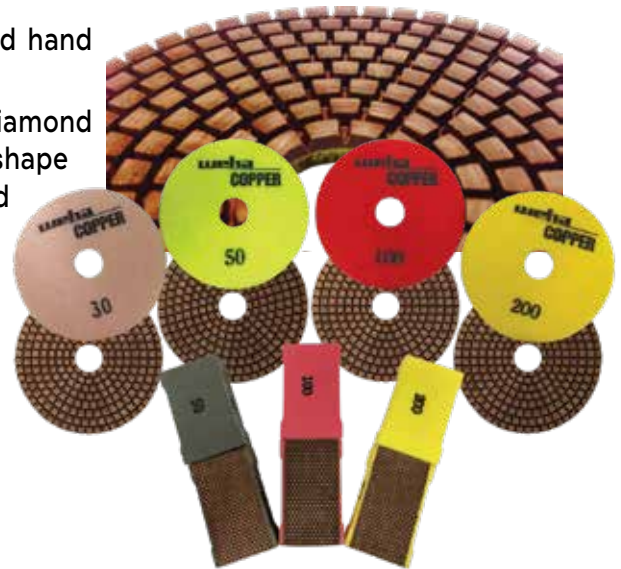

Part #	Description
15500	4" Weha Copper Flex Diamond Polish Pad 30 grit
15501	4" Weha Copper Flex Diamond Polish Pad 50 grit
15502	4" Weha Copper Flex Diamond Polish Pad 100 grit
15503	4" Weha Copper Flex Diamond Polish Pad 200 grit

## Weha Copper Diamond Polishing Pads - Wet/Dry

Weha Copper Diamond Hand Pads are also full bond copper diamond hand pads that can be used wet and dry.

The life of these Copper Hand Pads are 3 times the life of standard diamond hand pads. And because of the copper bond, they remove stock and shape much faster than standard electroplated pads. Use the Copper Diamond Hand Pads in grits 50,100,200 to create the bullnose, remove stock, and start the polishing process. Then switch over to the 400 standard diamond hand pads. They will seamlessly switch over to finish the polish.

Part #	Description
15400	Weha 4" Copper Diamond Polishing Pad 30 Grit
15401	Weha 4" Copper Diamond Polishing Pad 50 Grit
15402	Weha 4" Copper Diamond Polishing Pad 100 Grit

13717	Weha Copper Diamond Hand Polishing Pad 200 Grit

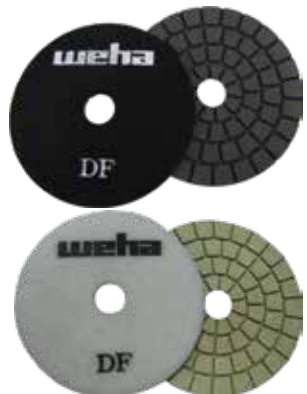

- » Wet or Dry
- » Hand pads 2"x3.5"

## Weha 4" Ultra Buff Final Polish Pads

Finding a final polish buff pad to do what it is meant to do has been quite difficult. Finally, Weha has produced a super high quality final buff pad that will achieve the purpose of what a buff pad is supposed to do: To top off the polishing process to perfectly match the original factory finish of the top of the slab or blend in the final touch of a surface scratch. The Weha Final buff pad will achieve that very result, without having to pay a fortune to get it!

Part #	Description
134FBB	Weha 4" Black Buff Final Polish Pad
134FBW	Weha 4" White Buff Final Polish Pad

**Compare to any buff on the market!**

# DIAMOND POLISHING PADS

Weha Diamond Hand Polishing Pads work with granite, marble, travertine, limestone, ceramic, concrete. Weha Diamond Polishing Hand Pads are preferred to be used wet, even with just a little water. Weha Diamond hand polishing pads are excellent for polishing up edges of material that has been profiled. The Weha Diamond Hand Polishing Pads come with a flexible foam backing that allows the pads to be used straight as well as be formed to the profiled edge that you are working with. Weha Diamond Hand Polishing Pads are 2" wide x 3 1/2" long for a firm grip for polishing. For more aggressive lower grit diamonds that create faster work and last longer try the Weha Copper Diamond Hand Polishing Pads.

Part #	Description
13700	Weha Diamond Hand Polishing Pad 30 Grit
13701	Weha Diamond Hand Polishing Pad 60 Grit

» Rigid                      » Up to 4500 RPM  
» Flare design          » Wet use

## Weha 4" Pitbull Diamond Hybrid Resin Cupwheel

The Weha 4" Pitbull Diamond Resin Cupwheel is a New Hybrid Resin Polishing pad with a harder bond to perform like a resin filled diamond cup wheel. However, the Pitbull Resin Cupwheel will grind and shape with zero chipping on the material.

The Pitbull resin cupwheel comes on a light weight rigid aluminum back. The resin diamond looks like a traditional polishing pad. But the bond is a more durable, longer lasting bond that will outlast traditional polishing pads.

Part #	Description
142311	Weha 4" Pitbull Diamond Hybrid Resin 30 Grit
142312	Weha 4" Pitbull Diamond Hybrid Resin 50 Grit
142313	Weha 4" Pitbull Diamond Hybrid Resin 100 Grit
142314	Weha 4" Pitbull Diamond Hybrid Resin 200 Grit

The Weha 4" Pitbull Resin Cup wheel can run wet or dry on all materials including granite, marble, quartz, engineered stone, porcelain, ceramic, cultured, concrete, and other stone with zero chipping.

The Resin Cupwheel can remove fiber mesh off the back of stone as fast as any diamond cupwheel can. It will create a bevel, round over, or larger radius very quickly.

# DIAMOND POLISHING PADS

## Weha Donkey Face Polish Diamond Polishing Pads

The Weha "Donkey" Pads are 4" Velcro backed Quartz Face, surface polishing pads designed specifically to repair the surface of quartz, engineered stone, granite, marble, and quartzite.

Outstanding for quartz scratch repair, blending seams, even polishing edges.

The Weha Donkey pads also work incredibly well on repairing marble etch marks and resurfacing marble counters for repair.

The Weha Donkey repair polishing pads are a diamond sponge system that holds a lot of water. This works amazing when doing repair work inside a home where water is limited.

The Weha Donkey pads will also work on granite surfaces as well.

**Also available in 5" and 6".**

# DIAMOND POLISHING PADS

## Weha Donkey Auto-Edge Inline Pads

Weha Velcro backed edge wheels are built and designed specifically for horizontal machines such as Comandulli machines, Montresor edge polishers as well as vertical polishing machines: Sasso Flying Flat, Park Industries FastBack, GMM Tower, Marmo 711, and other polishing machines.

Designed to accommodate between 5-9 heads, the Weha inline polishing combo system will create a fantastic polish on marble, granite, dark quartz, light quartz, quartzite, porcelain, ceramic, sintered stone, etc.

The Weha inline polishing wheels are velcro backed for quick replacement without the hassle of removing the snail lock holders.

The Step 0 is not needed under normal circumstances. Only use #0 if the edge is not flat or extremely rough and needs some stock removal before step 1.

This Weha combo system took several months of R & D and has been tested on 5 head vertical machines as well on up to 8 head horizontal machines. The combination of the 3 Step and Donkey Pads is producing an excellent polish on all materials with all machines. The Step 1,2,3 will be used together in sequence.

### For 5 head machines:

Step 1,2,3, Donkey Pad 1000,2000 or 2000, 3000 depending on the stone and how much gloss you need to match.

Typical quartz use 1,2,3, Donkey Pad 1000, 2000. For greater texture use Step 1,2,3 Donkey Pad 600, 1000

**For 6 or more head machines** the sequence can be the same as the 5 head sequence. You may add the 3000 grit Donkey for the occasional very difficult granite.

### 5" Donkey Inline Set Includes:

# CUPWHEELS

## Weha Rubber Diamond Cupwheel

The Weha Rubber Diamond Cupwheel is the ultimately the smoothest running cupwheel produced. The Rubber cupwheel has traditional diamond segments. But with a specially designed rubber that separates the diamonds from the aluminum thread, it completely absorbs all vibration from the tool and the stone. Can be used wet or dry. Max 10,000 rpm.

Part #	Description
50250	4"x5/8"-11 Weha Rubber Diamond Cupwheel - Coarse
50251	4"x5/8"-11 Weha Rubber Diamond Cupwheel - Medium
50255	5"x5/8"-11 Weha Rubber Diamond Cupwheel - Coarse
50256	5"x5/8"-11 Weha Rubber Diamond Cupwheel - Medium

- » Easier on the grinder
- » Less user fatigue
- » Rubber backed
- » Vibration free
- » Super Smooth

## Weha 4" Pitbull Diamond Hybrid Resin Cupwheel

The Weha 4" Pitbull Diamond Resin Cupwheel is a New Hybrid Resin Polishing pad with a harder bond to perform like a resin filled diamond cup wheel. However, the Pitbull Resin Cupwheel will grind and shape with zero chipping on the material.

The Pitbull Resin Cupwheel comes on a light weight rigid aluminum back. The resin diamond looks like a traditional polishing pad. But the bond is a more durable, longer lasting bond that will outlast traditional polishing pads.

The Weha 4" Pitbull Resin Cup wheel can run wet or dry on all materials including granite, marble, quartz, engineered stone, porcelain, ceramic, cultured, concrete, and other stone with zero chipping.

Part #	Description
142311	Weha 4" Pitbull Diamond Hybrid Resin 30 Grit
142312	Weha 4" Pitbull Diamond Hybrid Resin 50 Grit
142313	Weha 4" Pitbull Diamond Hybrid Resin 100 Grit
142314	Weha 4" Pitbull Diamond Hybrid Resin 200 Grit

The Resin Cupwheel can remove fiber mesh off the back of stone as fast as any diamond cupwheel can. It will create a bevel, round over, or larger radius very quickly.

## Weha WX2 Cupwheel/Blade/Rodding Blade

The Weha WX2 Multi Blade/Cupwheel is an extremely versatile tool for both the shop and the job site. The WX2 can be used as a diamond cupwheel for aggressive, yet smooth finish grinding. It can be used as a traditional diamond impregnated diamond blade for cutting with a grinder. And with a thickness of 3/16" it can also be used as a rodding blade! Made with premium quality diamonds, the WX2 can be a one stop blade for multiple uses in the shop and on the job site. Comes with the quad adapter. Can be used wet or dry. Max 10,000 rpm.

Part #	Description
50272	5"x5/8"-11 Weha WX2 Diamond Cupwheel

- » Cutting
- » Grinding
- » Rodding
- » Comes with Quad adapter

# CUPWHEELS

## Weha Resin Cupwheels

Resin Filled cupwheels are perfect for chip free grinding and honing. Diamonds are specifically placed on the cup wheel for maximum speed. Resin is filled to eliminate bouncing, or "biting" into the material-the things that cause chipping.

- » Resin Filled
- » Chip-free finish

- » Perfectly balanced
- » 5/8-11 thread

Part #	Description
7680	4"x5/8"-11 Resin Filled Cupwheel-Course
7681	4"x5/8"-11 Resin Filled Cupwheel-Medium
7682	4"x5/8"-11 Resin Filled Cupwheel-Fine

## Weha Blitz 4" Resin Filled Cupwheels

Weha Blitz Resin Filled cupwheels are perfect for chip free grinding and honing of granite, marble, quartz, and all natural stone. With ridiculous amounts of diamond embedded in to this cupwheel, the life is crazy good. Additionally the design pattern with additional circular diamonds inside create even stock removal.

Part #	Description
7685	Weha Blitz 4" Resin Filled Cupwheel-Coarse
7686	Weha Blitz 4" Resin Filled Cupwheel-Medium
7687	Weha Blitz 4" Resin Filled Cupwheel-Fine

## Weha Vacuum Brazed Contour Cupwheel

Weha Diamond Vacuum Brazed Contour Cup Wheels for granite, marble, engineered stone, and all natural stones. Vacuum Brazed Contour Cup Wheels are very aggressive, light weight, run extremely smooth, virtually chip free and never need dressing.

Weha Vacuum Brazed Cup Wheels are very thin metal cup wheels for stock removal and shaping on practically any surface.

- » High quality for granite & marble
- » Contour shape allows inside radius grinding
- » Smooth, chip free results
- » 5/8-11 thread
- » Super light weight cupwheel
- » May be used WET or DRY

Part #	Description
51072	4" x 5/8"-11 Vac Brazed Contour Cupwheel

## 4" Flap Diamond Cupwheel

The Weha Flap Diamond Disc Cupwheels are an outstanding aluminum backed diamond cup wheel for shaping and polishing granite, marble, engineered stone, quartzite, ceramic, porcelain, and other materials. These cup wheels have been fully tested on Cosentino Dekton®, Breton Lapitec®, Marble, Granite, Engineered Stone, Quartz materials, Concrete counter tops. They are perfectly balanced with zero vibration.

Part#	Description
7650	4" Flap Diamond Cup Wheel 60 Grit
7651	4" Flap Diamond Cup Wheel 120 Grit
7652	4" Flap Diamond Cup Wheel 200 Grit
7653	4" Flap Diamond Cup Wheel 400 Grit

- » Light weight
- » Zero chipping
- » Outstanding for honing

# WERAMIC

## Weramic CNC Porcelain Ceramic Core Bits - 1/2 Gas

Weha Weramic 1/2 Gas CNC Core bit has been designed specifically for large porcelain panel and Ultra compact sintered stone material such as Dekton®, Lapitec®, Neolith®, Laminam®, etc. Weha Weramic CNC porcelain and ceramic core bits work excellent on all CNC machines such as Breton®, Northwood®, Park Industries®, and other cnc machines.

These core bits have been built to core perfectly smooth, chip free holes on all thickness materials from 6mm - 30mm. With a 2mm thick rim, these thin wall core bits will drill very clean and fast through the porcelain and ceramic materials.

Part#	Description
142844	Weha Weramic CNC Core Bit 1/2 Gas 1" - 26mm
142845	Weha Weramic CNC Core Bit 1/2 Gas 1 1/4" - 32mm

# CORE BITS

## Weha Dry Magic Vacuum Brazed Core Bits

Weha Dry Magic Vacuum Brazed Core Bits are a Porcelain Core Bit, Ceramic Core Bit, Marble Core Bit, and Granite Core Bit all in one. The best vacuum brazed Dekton® Core Bit because it can be used wet or dry, minimal chipping, and no cracking of the Dekton®. Also, one of the best marble core bits for similar reasons. Virtually no chipping, minimal blowout on the bottom, fast drilling, and great life. Weha Vacuum Brazed Diamond Core Drill Bit drills cleanly dry with zero chipping. The vacuum brazing is on both the inside and outside of the barrel.

This special Vacuum II Brazed diamond technology allows an uncomplicated,

hands-free and clean drilling on angle grinders. The vacuum diamond coating allows fast drilling with extremely clean, chip, free holes. The Weha Vacuum Brazed Core Bits are designed to drill hard and brittle materials such as ceramics, porcelain, marble, granite, stone materials. Also materials such as stoneware, glazed clinker and hard roof tiles can also be drilled.

- » Dry use
- » May be used wet
- » Recommended RPM: 3000-11000
- » 5/8x11 thread

## Weha Dry Magic Hex Core Bits for Electric and Cordless Drills

Weha 1/4" 6mm Dry Magic Vacuum Brazed Hex Head Non Core Bits are made to drill in ceramic, porcelain, granite, marble, quartz, and all natural and engineered stones. These vacuum brazed drill bits are made to be used on Cordless and Electric Drills. The shaft is hexagon shaped to fit all cordless and electric drills. This keeps the diamond drill bit from spinning while drilling. The Dry Magic Hex Head Core Bits can be used wet or dry and can be run from 700-6,000 rpm.

## CNC 1/2 Gas

### Weha RockPecker CNC Diamond Core Bits

Weha RockPecker 1/2 Gas CNC Core bit has been designed specifically for granite, quartz, quartzite, engineered stone, limestone, travertine, concrete, soapstone, and other natural stone materials. The Weha RockPecker CNC core bits work excellent on all CNC machines such as Breton, Northwood, Park Industries, and other cnc machines.

The RockPecker CNC core bits have been built to core perfectly smooth, chip free

holes on all thickness materials. With a 1mm thick rim, These thin wall core bits will drill very clean and fast.

Part#	Description
142883	Weha RockPecker CNC Core Bit 1/2 Gas 1 1/4" - 32mm
139329	Weha RockPecker CNC Core Bit 1/2 Gas 1 3/8" - 35mm

142919	Weha RockPecker CNC Core Bit 1/2 Gas 3" - 76mm

- » Total length: 4 3/16" (106mm)
- » Drilling depth: 2 9/16" (65mm)
- » 1/2 Gas male CNC Thread
- » Recommended RPM: between 750-2800 rpm
- » Feed rate: between 3"-4" per minute

## 5/8-11 Thread

### Weha RockPecker Diamond Core Bit - Wet Use

The Weha RockPecker Core Bit is made specifically for drilling holes in granite, quartz, engineered stone, quartzite, marble, limestone, travertine, concrete, and other stone.

With only a 2mm thick diamond rim, will "bite" into the stone

quickly and drill fast through the stone. These wet diamond core bits are made with a special bond that favors the hardness of quartz materials, along with the resin that they are made with, to drill very fast and very clean.

Part#	Description
142890	Weha RockPecker Core Bit 1/2" - 14mm
142892	Weha RockPecker Core Bit 3/4" - 20mm

# CORE BITS

## Weha Blitz High Speed Dry Core Bits

Weha 1 1/2" High Speed Diamond Core bit for granite, marble, quartzite, quartz, engineered stone, concrete counter tops, and all natural stone. With diamonds both inside and outside the barrel to reduce drag, heat, and friction, along with high diamond content segments, the Weha dry diamond core bits will drill holes in 3cm granite in less

Part #	Description
20136	1"x4"x5/8-11 High Speed Dry Core Bit-Dry
20137	1 1/4"x4"x5/8-11 High Speed Core Bit-Dry
20138	1 3/8"x4"x5/8-11 High Speed Core Bit-Dry

20140	1 3/4"x4"x5/8-11 High Speed Core Bit-Dry
20141	2"x 4"x 5/8-11 High Speed Core Bit-Dry

than 30 seconds. The Weha High Speed Diamond Core Bits are built to be the best dry diamond core bit for granite and engineered stone counter top faucet hole drilling.

But they can also be used wet with Air Polishers in shop applications.

## Weha Puma T Segment Core Bits with Side Diamonds

The Weha Puma T segment Core bits are designed for fast cutting of granite, quartz, marble, and even quartzite.

Made with a T segment that drops into the steel body allows the Puma Core Bit to take even greater abuse while drilling by hand into stone. This great reduces the likely hood of a segment breaking off when "wobbling" the core bit during the drilling process.

The Weha Puma T Segment has a full drilling depth of 2 3/4" when the segment is worn completely down. This gives plenty of drilling depth for all counter top applications but short enough to offer solid control when drilling.

- » Thread: 5/8"x11
- » Total Length: 4"
- » Max RPMs: 6500
- » Use wet or dry

Part #	Description
5368	Puma 1" T Seg Core Bit

5373	Puma 2" T Seg Core Bit

## Weha Water Rings

Weha Water rings are designed to create a vacuum to the stone to hold water while drilling holes on the job site.

Part #	Description
4521	Weha Water Ring 3"

## Weha 3/8" Shaft x 5/8-11 Threaded Adapter

Weha 3/8" Shank x 5/8-11 threaded adapter is perfect for turning any 5/8-11 female threaded tool into a 3/8" shank that can be used on cordless drills, electric drills, drill presses, etc. 3/8" male shank to a 5/8-11 threaded male.

Part#	Description
4524	Weha 3/8" Shaft x 5/8-11 Threaded Adapter

## Weha 5/8-11 to M14 Threaded Adapter

This adapter has 5/8-11 male thread on one end and M14 female on the other. This Adapter allows hand tools with M14 thread spindle to use diamond tools with 5/8-11 female threads. It has a center water hole to allow water to run from the spindle through the adapter.

Part#	Description
4523	Weha 5/8-11 to M14 Threaded Adapter
4525	Weha M14 to 5/8-11 Threaded Adapter

## Weha Resin Filled Zero Tolerance Wheels

Weha Diamond Zero Tolerance Drums are premium quality zero tolerance wheels that perform with the best brand names in the industry. Each individual Zero Tolerance Wheel is perfectly balanced to make sure runs true with no bouncing. As an aggressive stock removal tool, the Weha Resin Filled Zero Tolerance Wheel is designed to rapidly remove stock to get the counter top to the exact line needed for polishing or shaping. May be used wet or dry.

Part #	Description
30210	1"x1 1/2" 5/8"-11 thread Zero Tolerance Wheel Coarse
30211	2"x1 1/2" 5/8"-11 thread Zero Tolerance Wheel Coarse
30211M	2"x1 1/2" 5/8"-11 thread Zero Tolerance Wheel Medium
30212	3"x1 1/2" 5/8"-11 thread Zero Tolerance Wheel Coarse
30212M	3"x1 1/2" 5/8"-11 thread Zero Tolerance Wheel Medium

- » Perfectly balanced
- » Aggressive stock removal
- » Smooth finish
- » Long life
- » Resin filled
- » Center water feed
- » Wet or dry use
- » 10,000 rpm

## Weha Vacuum Brazed Zero Tolerance Wheels - Top Bearing

The Weha 2" Vacuum Brazed Zero Tolerance Wheel Coarse Top Bearing with 5/8"-11 thread is excellent for shaping and dressing up granite and natural stone.

The great advantage of using Vacuum Brazed Zero Tolerance Cutters is that they will not lose their shape, they can be used dry or wet with the center water feed holes.

Vacuum Brazed Zero Tolerance wheels offer virtually chip free stock removal. Zero Tolerance wheels are much safer than using Silicon Carbide Cup wheels.

Part#	Description
30215	Weha 2"x2" 5/8"-11 thread Vac Brazed Zero Tolerance Wheel Top Bearing
30216	Weha 3"x2" 5/8"-11 thread Vac Brazed Zero Tolerance Wheel Top Bearing

## Weha Vacuum Brazed Zero Tolerance Wheels - No Bearing

The Weha 2" Vacuum Brazed Zero Tolerance Wheel Coarse Top Bearing with 5/8"-11 thread is excellent for shaping and dressing up granite and natural stone.

The great advantage of using Vacuum Brazed Zero Tolerance Cutters is that they will not lose their shape, they can be used dry or wet with the center water feed holes.

Vacuum Brazed Zero Tolerance wheels offer virtually chip free stock removal. This means you can remove stone all the way to the line without the worry of blowout.

By not having a bearing on top, the Weha Vacuum Brazed Zero Tolerance wheel is the best choice for use by hand tool or with a radial arm with no template.

Part#	Description
30198	Weha 1"x2" 5/8"-11 thread Vac Brazed Zero Tolerance Wheel Coarse - No Bearing

- » Radial arm with no template
- » Max RPM: 4000

# FINGER TIPS

## Weha Puma Radial Arm Finger Tip

Weha PUMA Radial Arm Finger Tip for granite, marble, quartz, quartzite, engineered stone counter top sink and vanity bowls

Weha Radial Arm Finger Tip is a high performing diamond tip for cutting out granite sinks, marble vanity bowls, quartz bowls, and other granite and stone hole applications with radial arm machines.

With fast cutting speed, the Weha Finger Tip will cut up to 20 bowls while leaving the bowl ready for polishing pad use.

The Weha Radial Arm Finger Tip is made for all Radial Arm Machines such as Thibault®, Wizard®, Fabking®, Scorpion®, and other radial arm machines.

This incremental cutting finger tip is designed to follow the sink or vanity bowl template and work around the template on the stone to grind down the granite sink or vanity bowl. This will leave the stone perfectly straight and ready for profiling and polishing.

The Weha Radial Arm Finger Tip comes with a 12mm thread that can fit all Radial Arm Finger Tip 1/2 Gas Adapters that are 12mm female thread. This makes it very easy to switch over to premium quality Weha Radial Arm Finger Tips!

- » 20mm x 20mm x 14mm thread
- » Designed for radial arm machines
- » Cutting bowls
- » Used with a 1/2 gas adapter
- » Very fast cutting
- » No glazing over

## Radial Arm Finger Tip

Radial Arm Finger Bit Tip for granite, marble, quartz, quartzite, engineered stone counter top sink and vanity bowls

Weha Radial Arm Finger Bit Tip is a high performing diamond tip for cutting out granite sinks, marble vanity bowls, quartz bowls, and other granite and stone hole applications with radial arm machines.

With fast cutting speed, the Weha Finger Bit Tip will cut up to 15 bowls while leaving the bowl ready for polishing pad use.

The Weha Radial Arm Finger Bit Tip is made for all Radial Arm Machines such as Thibault®, Wizard®, Fabking®, Scorpion®, and other radial arm machines.

This incremental cutting finger bit is designed to follow the sink or vanity bowl template and work around the template on the stone to grind down the granite sink or vanity bowl. This will leave the stone perfectly straight and ready for profiling and polishing.

The Weha Radial Arm Finger Bit comes with a 12mm thread that can fit all Radial Arm Finger Bit 1/2 Gas Adapters that are 12mm female thread. This makes it very easy to switch over to premium quality Weha Radial Arm Finger Tips!

- » 20mm x 20mm x 14mm thread
- » Designed for radial arm machines
- » Cutting bowls
- » Used with a 1/2 gas adapter #30520

Part #	Description
30515	Radial Arm Finger Tip
30520	1/2 Gas x 14mm Thread Adapter for Radial Arm Finger Tip
30515R	Radial Arm Finger Tip - Reverse Thread
30520R	1/2 Gas x 14mm Thread Adapter for Radial Arm Finger Tip - Reverse Thread

## Weha Top Sprinter CNC Finger Bit

The Weha Top Sprinter is a modified 8 segment cnc finger bit for granite, marble, engineered stone. The Top Sprinter's sweet spot is between 12"-20" per minute between 5,000-5800 rpm, depending on the stone being used. The life will be excellent, the wear will be even, and the bit will provide an all around well performing finger bit on practically all stone that is run through the CNC.

- » Feed rate: 12"-20" per minute
- » RPM: 5000-5800
- » 8 segment (4 double segments)
- » 40mm x 20mm x 8 seg

Part #	Description
133915	Weha Top Sprinter CNC Finger Bit 40mm x 20mm x 8

## OMA HS8 8 Segment Finger Bit

The OMAHS8 high speed finger bit is an 8 segment finger bit that can run 12"-40" per minute. Made in Italy by OMASystem, the OMAHS8 can accommodate all fabrication needs. For fast production, run as fast as 9200 rpm to achieve 40" per minute. To achieve optimum life and best performance on granite, quartz, engineered stone, and marble run 4800-5000 rpm at 16-18" per minute. This will result in the best life of the finger bit.

- » Feed rate: 12"-40" per minute
- » RPM: 4800-9200
- » Total Length: 82mm
- » 40mm x 20mm x 8 segment

Part #	Description
XTBIT3HS8	OMA 22mm x 40mm x 8 Seg Finger Bit

## Weha Top Racer CNC High Speed Finger Bit

The Weha Top Racer diamond CNC high speed finger bit is a premium high speed diamond cnc finger bits for high speed production. The Weha Top Racer High Speed Finger Bit is unbelievable on granite, marble, and especially engineered stone, quartz materials. The faster you run the Top Racer, the better it performs!

- » Feed Rate: 24" - 36" per minute
- » RPM: 5500-8500
- » 8 segments
- » 20mm x 40 mm dimensions

Part #	Description
C5002835	Weha 20mm x 40mm x 8 Seg Red Top Racer

# AIR TOOLS & HAND TOOLS

## Weha Rock Dog Single Speed Router with Aquaplaning Base

The Weha Rock Dog Router is a 9000 RPM single speed Router that can profile practically any edge that comes through the shop.

Whether you need a router for granite, marble, quartz, quartzite, or any other stone, the Rock Dog Router can get it done.

Made with a Unibody Aircraft Aluminum housing, the Rock Dog is a super smooth 9000 rpm profile router that can get the job done fast.

With a 2.4 HP 220 Single Phase motor, the Rock Dog can profile up to 6cm without any worries whatsoever.

The Rock Dog Router comes with an aquaplaning base for easy movement across the surface.

The 22mm x 10mm thread spindle accommodates practically all router bits on the market.

The Rock Dog comes with a 20' long heavy 12 gauge AWF with ground power cord that can handle the load.

The water connection is a quick disconnect for easy connection to the shop water lines.

**12 Month Warranty • Water Quick Disconnect  
Fits Router Bits with a 22mm Shaft • 10mm Thread**

### Specifications:

- » Spindle: Stainless Steel
- » Rotation Speeds: 9,000 rpm
- » Rise and Fall: 1.18"
- » 22mm Shaft with 10mm bolt thread
- » Frame: Unibody 1 piece Aircraft Aluminum Housing
- » Power: 2.4HP
- » Supply Power: 230V / 60HZ / Single Phase
- » Water Quick Disconnect
- » Thermal Overload Safety Cut-out
- » Base: Aquaplaning System
- » Machine Length: 22", Width: 13.7", Height: 15"
- » Machine Weight: 77 lbs

Part #	Description
9000	Weha Rock Dog Single Speed Router

## Weha Continuous Rim Router Bits

Weha continuous rim router bits are the best for profiling and routing granite, marble, quartz, engineered stone, and concrete countertops. These continuous rim bits are high concentrated diamond bits that cut fast, last long, and leaves the stone smooth and chip free. Comes with 2 thread size bolts to fit all routers.

## Weha Vacuum Brazed Profile Bits

Weha Vacuum Brazed Profiler bits are outstandingly high quality vacuum brazed profiler bits that will profile quickly and smoothly on marble, granite, stone materials. They can be used on handheld tools with center water feed. May also be used with standard grinders with external water applied. The Weha Hand Profiler comes with a heavy density rubber guide to prevent scratching on the surface. The Weha Vacuum Brazed Profile Bits comes with 5/8-11 thread for grinders.

OR CONTACT WEHA USA FOR SIZES AND AVAILABILITY**

# AIR TOOLS & HAND TOOLS

## Weha Rear Exhaust Air Polisher

The Weha Rear Exhaust Center Water Feed granite and stone Air Polisher is a premium quality air polisher designed to work in granite and stone fabrication shops 24 hours a day, 7 days a week. Will not lose power during the granite and stone polishing process.

- » Rear exhaust muffler
- » Reversible side handle
- » Spindle-thread: 5/8-11"
- » Air required: 16 CFM @ 90 psi
- » Weight: 3.5 lbs
- » Front handle T-Grip
- » Center water feed
- » Max speed: 5000 rpm

**Comes with a wrench, T-Grip handle, clip on water, dust shield and carry case.**

Part #	Description
138251	Weha Rear Exhaust Air Polisher

## Weha WH185 5" High Speed Waterfed Air Grinder & Cutter

The Weha WH185 5" High Speed Air Grinder and Cutter is a Front Exhaust air grinder and air cutter that is made to endure the tough environments of a granite fabrication shop.

The WH185 accepts up to a 5" blade, 5" Contour Blade, Diamond Cupwheels, Zero Tolerance wheels, etc. The external water feed supplies water to both sides of the blade, diamond cup wheel, etc to keep plenty of water on the material. The WH185 also comes with center water feed through the spindle for zero tolerance wheels, and other center water feed attachments.

### Specifications:

- » Length: 18.5"
- » Weight: 4.5
- » Max Blade: 5"
- » Max RPM: 11,000
- » Operating Pressure: 90 PSI
- » Air Consumption: 9.8CFM
- » Spindle Thread: 5/8-11
- » Water: 2 External and 1 Internal

**Warranty:**  
 10, 90, 90+ warranty:  
 10 day Replaces the tool  
 90 day Warranty repair  
 90+ days repaired at cost

**Can be also be run without water**

Part #	Description

## Weha Stone Chisel

Fully automatic production of chiseled edges by breaking the slab edge. Faster processing in comparison with the traditional method. Improved ergonomic construction. Adjustable tool according to the slab thickness.

- » Slab Thickness: Up to 1 5/8"
- » Length: 14"
- » Width: 11"
- » Height: 11.5"
- » Air Pressure: 120 PSI
- » Air Req. per Stroke: 4 CFM
- » Weight: 32 lbs

Part #	Description
7264116	Weha Stone Chisel

## Weha T-31 Anchor Machine Kit for Bowls & Vanities

The Weha T-31 Anchor Machine is a completely new concept when compared to existing T-31 Anchor Machines. All T-31 Anchor Machines on the market require the stone to be flipped over and the T-31 anchor slots be cut with the machine sitting on top of the bottom of the stone. Most of the T-31 Anchor Machines use a vacuum suction plate that must vacuum to the stone and then cut the anchor slot.

The Weha T-31 Anchor Machine does not require the stone to be flipped over to cut the Anchor Slots. Once the counter top or vanity is on the work table then cut out and polished, simply put the T-31 Anchor machine inside the bowl, slide in the Anchor machine to the depth that you need, and make the anchor slot. This drastically speeds up the time it takes to make the slots, reduces labor to flip the counter top, cuts down one less time of handling the counter top and reduces the risk of breaking the top.

The T-31 Anchor Machine can also be used upside down to make anchor slots on top. If you cut out a vanity or sink on a cnc machine with the top face down, before you remove the top from the pods you can easily take the T-31 Anchor Machine and cut out the slots before it ever leaves the cnc. If the top is completely polished, this would eliminate any need to put it on a work table to cut the anchor slots.

Kit Includes:

- » 1 bag (50 pcs) of Z Brackets
- » 1 bag (50 pcs) of T Anchor Bolts - 3/16" x 1/4" x 1 1/2" - Stainless Steel
- » 2 pieces of T-31 Anchor Bits - 3/16" x 1/4"

## Weha Welded Galvanized Granite Shop Cart 2000 lb Capacity

The Weha Granite and Stone Drywall Fabrication Shop Cart is welded and hot dipped galvanized for years of use. Weha has received numerous requests for a welded cart for greater stability.

The Weha Welded Granite Fabrication Shop Cart has been redesigned to work with the current slabs that are being fabricated. Now slabs are getting 65", 70", and even 80" tall. Traditional carts are not made to handle this height, as they will tip over much easier as the load gets higher.

The Weha Welded shop cart now has a wider wheel base with total width at 28". This additional width allows the full weight load of the taller slabs to stay between the wheels, drastically reducing the possibility of flipping over. For standard slabs it becomes the safest drywall cart/shop cart on the market.

### Specifications:

- » Overall Length: 48"
- » Overall Height: 49"
- » Overall Depth: 28"
- » Surface Deck: 14" x 44"
- » 38 1/2" from deck to top of shop cart
- » 2 swivel wheels
- » 2 fixed wheels
- » Weight capacity: 2000 lbs
- » **Comes completely welded**
- » **Only assembly is attaching wheels**

## Weha Yellow 2 Wheel Install Stab Dolly 1100 lb Capacity

The Weha yellow 2 Wheel Slab Dolly is a great install dolly for bringing in larger pieces and islands. Special 10" Rubber tires with weight capacity of 1100 lbs give this granite install dolly plenty of weight lifting power to handle any install. The stone channel comes with a wood bed for the stone to rest against. The stone channel is also 3 1/2" wide to accommodate laminated tops. The Weha 2 wheel granite install dolly is painted safety yellow for easy visibility for loading and moving. This dolly will also work great for glass, metal, drywall and other sheet goods.

- » Dimensions: 20" x 4" x 10"
- » C channel load width: 3 1/2"
- » 10" pneumatic tires
- » Weight capacity: 1100 lb capacity

Part #	Description
137203	Weha Yellow 2 Wheel Install Slab Dolly

## Weha Safety Yellow Slab Dolly with 4 Wheels 700 lb Capacity

The Weha yellow 4 Wheel Slab Dolly is a great install dolly for bringing in larger pieces and islands. Special rubber tires with weight capacity of 700 lbs give this granite install dolly a unique advantage. The Blue 8" tires offer a special rubber that keeps marks off the floor while installing. The 3 1/2" stone channel comes with a wood bed for the stone to rest against. The Weha Granite Install Dolly is painted safety yellow for easy visibility for loading and moving. Although the granite dolly comes with the 2 extra balance casters, they do not have to be installed. Or only 1 can be installed. This is a personal choice and preference. This dolly will also work great for glass, metal, drywall and other sheet goods.

### Specifications:

- » 40" x 4" x 8"
- » Tire Diameter: 8"
- » C channel load width: 3 1/2"
- » Weight capacity: 800 lb capacity

## Weha Yellow Fabrication Work Table Adjustable Height from 34" to 44"

The Weha Fabrication Stand is made is a great way to fabricate counter tops in the shop. Use as many as you need for each and every job.

The Weha Fab Stands are excellent for job layout, L Pieces, and making sure multiple pieces lay out perfect and match up to the template.

Easy to move around, the Weha Fabrication Stands can be used throughout the shop in many different areas.

At 25" wide, the Weha Fab Stand supports the full width of a counter top. The Weha Fabrication Stand adjusts from 34" up to 44".

Made in high visibility safety yellow paint, the Weha Fabrication Stand is easy to load and not trip over.

Not only for the shop, but the Weha Fab Stand can be taken to the job site for finishing up the install.

The Weha Fab Stands are stackable for transport to the job site and to save space in the shop when not in use.

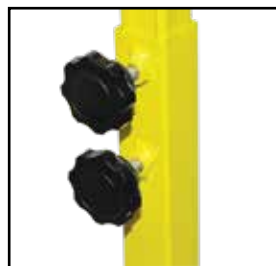

Part #	Description
137235	Weha Yellow Fabrication Work Stand

## Weha Sink Cut Out Stand

Weha heavy duty Sink Cut Out Stand and Stone Support Stand is designed to slide under the sink and vanity cut out to support the cut out from dropping and most importantly from breaking the countertop during the cut out fabrication process. Also use the Sink Cut Out Stand to Support job layout, larger islands that hang over the work tables, or take on the job site for extra hands.

### Specifications:

- » Fully adjustable height from 23" to 41 1/4"
- » Base and top: 12" x 12" to fully support the stone
- » Double screw bolt tightening
- » Weight: 8 lbs

Part #	Description
138721	Weha Sink Cut Out Stand

# WORK TABLES

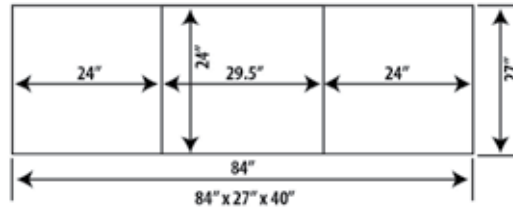

## Weha 27" Yellow Wood Top Insert Counter Top Work Table

The Weha 27" Wood Top Insert Work Table is made specifically for fabricating granite, marble, and stone counter tops, vanities, bar tops, etc. The Weha Counter Top Work Tables are made out of solid steel that will support 2cm, 3cm, and laminate granite, engineered stone, quartz, quartzite, and all stone without any problems at all.

The Weha Work Table has a 29 1/2" x 24" center opening that allows for bowl cutouts and polishing. With a weight capacity of 882 lbs, practically any piece of granite or stone can be put on the Weha fabrication work tables. Push 2 of the Weha Granite Work Tables together and an island can easily be fabricated and polished.

### Specifications:

- » Load Capacity: 882 lbs
- » Length: 84"
- » Width: 27"
- » Height: 40"
- » 24" x 29 1/2" Center for bowl cutting and polishing
- » 4 swivel casters with locks
- » Top is open
- » Insert 2"x 4" or 2" x 6" for full adjustment
- » Simply cut the 2x wood and insert into the top
- » Wood not included

Part #	Description
143370	Weha 27" Yellow Wood Top Insert Work Table

## Weha 28" Wood Top Insert Counter Top Work Table

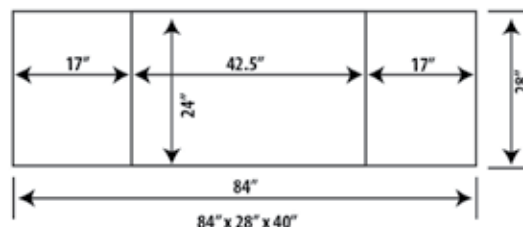

The Weha Counter Top Fabrication Work Table with Wood Inserts is made specifically for fabricating granite, marble, quartz, quartzite, and stone counter tops, vanities, bar tops, etc.

The Weha Counter Top Work Tables are made out of solid steel that will support 2cm, 3cm, and laminate granite, engineered stone, quartz, quartzite, and all stone without any problems at all.

The Weha Work Table has an open top that is made to have 2 x 4 or 2 x 6 wood to be cut and placed inside the work top. The stone will then sit on top of the wood to prevent scratches as well as to easily slide the wood around the sink and bowl opening for easier fabrication.

### Specifications:

- » Load Capacity: 882 lbs
- » Length: 84"
- » Width: 28"
- » Height: 39"
- » 24" x 42 1/2" Center for bowl cutting and polishing
- » 4 swivel casters with locks
- » 4 locking posts
- » Top is open
- » Insert 2"x 4" or 2" x 6" for full adjustment
- » Simply cut the 2x wood and insert into the top
- » Wood not included

Part #	Description

# PROPER LOADING OF A-FRAMES

## A-Frames Loaded Normally with 1 Granite Slab (Max Size) - ISO View

The A-Frame design analyzed in this report includes this top bar. A-Frames fabricated without this are not as strong.

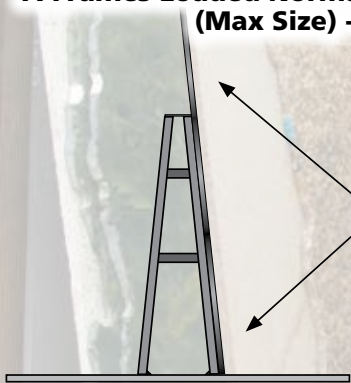

An underlying assumption in all calculations is that the A-Frames are statically loaded on a level, flat, hard surface and they are used in pairs. Any other conditions may nullify the results of this report

The bottom of the slabs rests on lumber.

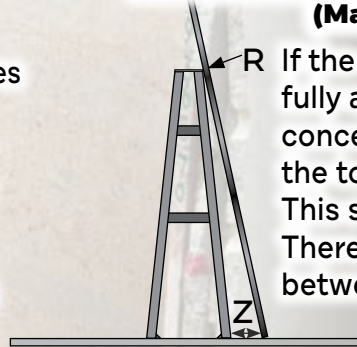

The "slab" of granite used in this study is 12' x 7' x 3cm (3.66 x 2.13 meters) and weighs 1572.5 lbs, representing a density of 0.11 lbs per cubic inc. Density is a factor in the weight of the slab.

## A-Frames Loaded Normally with 1 Granite Slab (Max Size) - Side View

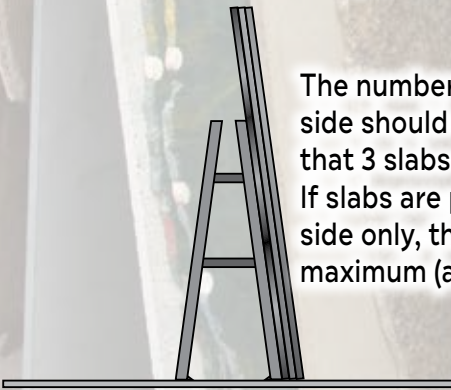

The first slab should be positioned on the A-Frames as shown with no gap. The applied forces of the slab are distributed along the structural angle of the A-Frames - and also downward on the channel portion.

## A-Frames Loaded Improperly with 1 granite slab (Max Size) - Side View

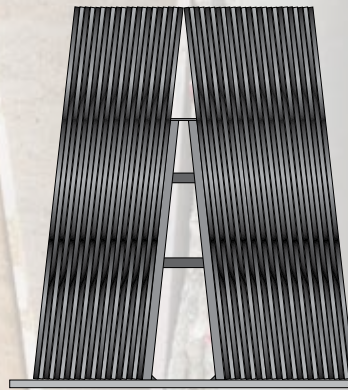

If the slab is not positioned fully against the upright, then a concentrated force (R) is applied to the top of the A-Frames as shown. This severe loading must be avoided. There should be no gap (z=0) between the slab and the A-Frames.

## Maximum Safe Loading of A-Frames - Ex. 1

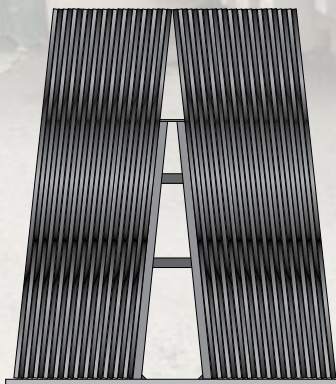

The number of slabs on one side should differ by no more than 3 slabs to the other. If slabs are placed on one side only, then 3 slabs is the maximum (as shown).

## Maximum Safe Loading of A-Frames - Ex. 2

The number of slabs on one side should differ by no more than 3 slabs to the other. It is okay to load 22 slabs on one side and 25 slabs on the other (as shown). It would also be okay to load 23 on one side and 25 on the other, but not 21 on one side and 25 on the other. Other than the difference of 3, which may include slabs of any size up to 12' x 7' x 3 cm, the

remaining slabs should be evenly matched on each side of the A-Frames - that is, a slab of whatever dimensions on one side should have a counterpart of the same dimensions on the other side.

## Maximum Safe Loading of A-Frames - Ex. 3

Ideally, the A-Frames are loaded evenly on both sides. Also, each slab should be centered (front to back on the two A-Frames).

## Weha Safety Yellow Granite and Stone Double Sided A-Frame Storage Rack Set with Crossbar. 24,000 lb (12,000 lb per side)

Weha Safety Yellow Granite and Stone A-Frame Storage Rack Set with Crossbar are made to support granite, marble, engineered stone, quartz, quartzite, and all other sheet materials.

Painted safety yellow for high visibility for easy loading and unloading, as well as customer walk through. The Weha A-Frame Storage Slab Rack has a wide 4 1/4" inside diameter C channel on the bottom so that a piece of 2 x 4 can be put into the channel if preferred.

The Weha safety yellow A-frame storage rack is made to hold full bundles of both 2cm and 3cm materials on both sides of the A-Frame. The Weha A-Frame Storage Slab Rack comes as a set of 2 plus crossbar and all hardware.

### Specifications:

- » Crossbar spread after mounted to A-frames: 60"
- » Total length of base: 60"
- » Total height: 59 1/2"
- » Spread at top of A-frame: 6 5/8"
- » Total height of slab storage: 87"
- » Maximum storage length per side: 20 1/2"
- » Inside width of storage A-Frame base: 4 1/4" with 1" side ledges

Part #	Description

## Weha Hippo HD Bundle Rack - 190,080 lb Weight Capacity

Weha Hippo HD Bundle Rack offers the strongest and largest weight capacity granite and stone bundle rack produced. The Weha Hippo HD Bundle Rack set comes with 2 10 foot bases and 16 Posts with white rubber caps. The Weha Hippo Heavy Duty Bundle Rack is rated to support the heaviest bundles of stone out there. Weha wanted to combine weight capacity with high frequency of moving bundles that generally fatigue less weight capacity granite bundle racks. The Weha Hippo HD Bundle Rack will do both of these for many years to come.

### Specifications:

- » Comes with 2 - 10' rails and 16 - 60" square poles.
- » Load Capacity: Each Post: 11,880 lbs. Set of Posts: 23,760 lbs. Full Rack with 8 Sets: 190,080 lbs
- » Post: 60" x 2.5" x 2.5" (63mm x 63mm) 28 lbs each
- » Base: 10' x 7 3/4" x 6". Post receivers in Base: 23. Receivers spaced 5" in center.
- » Each Post comes with White rubber caps

## Weha Buffalo Bundle Slab Storage Rack - 92,000 lb Weight Capacity

Weha Buffalo Bundle Slab Storage Racks are the latest technology in vertical stone storage.

### Specifications:

- » 6 point post touch locking system increases metal to metal contact from a standard 4 1/2" to over 9 1/2".
- » Weha special patent multi locking post to base design increases strength by 57%
- » 14 receivers spaced at 8 1/2" on center. 6" from hole to hole
- » 2 - 10' rails and 16 - 60" or 72" square poles
- » Poles are 2 3/8' x 2/3/8" x 60" or 72" with white rubber caps. Each pole comes with the Weha Signature Safety Angle Bracket
- » Anchor holes for securing the Buffalo bundle racks to the floor when required.

Part #	Description
137328	Weha 60" Buffalo Bundle Slab Rack
145516	Weha 72" Buffalo Bundle Slab Rack

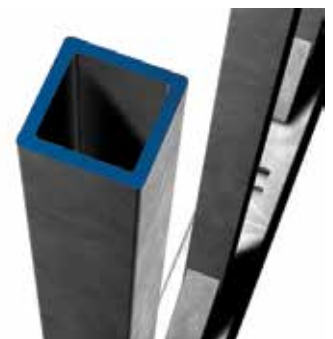

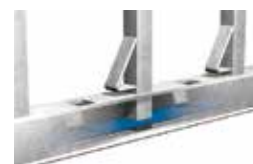

## Square Replacement Poles for Bison and Buffalo Storage Racks

Square Poles for the Weha Bison and Buffalo Slab Racks Galvanized with White Rubber Cap with Angle Bracket.

Each Pole comes complete with: a white rubber cap to protect the slabs, Welded Angle Bracket to set the correct angle for slabs to minimize pressure on the poles for safe slab storage.

Part #	Description
137327	60" Square Poles for Bison and Buffalo Slab Storage Rack
144750	72" Square Poles for Bison and Buffalo Slab Storage Rack

## Weha Bison 5' Interlocking Slab Storage Rack Set

- » Continuous locking full slab storage rack system for storing bundle and individual slabs
- » 2 - 5 ft. long base beams with 8 - 60" uprights with angle bracket
- » Stout 2 3/8" x 2 3/8" x 60" square tubing with white rubber cap
- » Angle brackets welded onto each pole for safety
- » Base rails have male/female built in locking connectors - no connectors to keep track of
- » Continuous storage with no space between sets
- » Internal steel reinforcement for extra stability
- » Holds up to 9000 lbs between poles (4500 lbs per pole)

Made of  
Hot Dipped  
Galvanized Steel!

137328	Weha Bison 5' Interlocking Slab Storage Rack Set

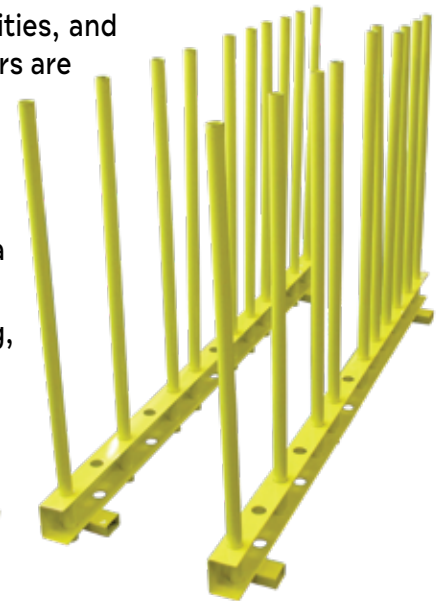

## Weha Heavy Duty Remnant Rack

The Weha Heavy Duty Stone Remnant Rack is excellent for storing cut pieces, vanities, and remnants of all kinds. This isn't the standard light weight remnant rack that fabricators are used to seeing around. The Weha Heavy Duty Remnant Rack is stout, sturdy, and strong enough to store all thickness remnants. Each 36" post weighs almost 3 1/2 lbs each! This is heavy duty steel. And the base is equally as strong to store entire row of remnants. Weha heavy duty stone storage remnant racks are outstanding for granite, marble, engineered stone, travertine, Dekton®, and all kinds of natural stone. The Weha Remnant Rack base rails are 60" long with 13 open holes per side for the poles.

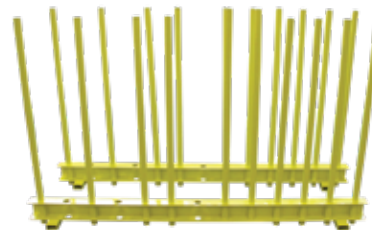

Painted with safety yellow powder coated paint for clear visibility during loading, unloading, and storage.

### Remnant rack includes:

- » 2-60" base rails
- » 20-36" poles
- » Max. Load Capacity of 2300 lbs between posts
- » Weight per set: 140 lbs

Part #	Description
134947	Weha Heavy Duty Remnant Rack

## Weha Yellow Waste Container

The Weha Stone Waste Container helps to solve the waste problem in the workshops. The Weha Stone Waste Bin is suitable for any fork-lift truck and for any length of fork. Simply fill the Weha Stone Waste Container Trash Bin with granite and stone scraps. When full, pick up from the top with the forklift, lift it over the dumpster and pull the side lever. The bottom of the Weha Waste Container will open up to empty the waste from the bottom.

- » Length: 46"                      » Depth: 24"
- » Width: 44"                        » Weight: 348 lbs
- » Height: 37.5"

Part #	Description
8161264	Weha Yellow Waste Container

Pick up from top  
lever. Opens bottom.

# SLAB LIFTERS

## Weha R400 Slab Grab

Very manageable and light slab grab with small dimensions and galvanized surface. Jaws and other contact surfaces are completely rubber coated. A return spring keeps it in the vertical position. When the slab is being put down, a locking automatism (protected by law) substitutes the manual locking.

- » Load Capacity: 882 lbs
- » Min. Height: 11"
- » Max. Height: 15"
- » Claw Width: 0.79 - 3.15"
- » Claw Surface: 6 x 4"
- » Weight: 17.6 lbs

Part #	Description
8010202	Weha R400 Slab Grab

## Weha R400 Twin

Very manageable and light slab grab with small dimensions and galvanized surface. Especially suitable for fragile slabs. Jaws and other contact surfaces are completely rubber coated. A return spring keeps it in the vertical position. Locking automatism (protected by law) as R 400.

- » Load Capacity: 1764 lbs
- » Min. Height: 11"
- » Max. Height: 15"
- » Claw Width: 0.8 - 3"
- » Claw Surface: 16 x 4"
- » Weight: 46 lbs

Part #	Description
8010204	Weha R400 Twin

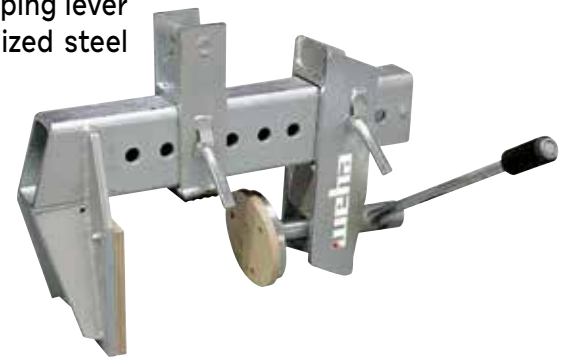

## Weha R1000 Plus

Reliable grab for the transfer and set up of monument slabs. A long clamping lever presses the jaw on the stone and guarantees max. work safety. Galvanized steel construction. Adjustable hanging eye for right balance.

- » Load Capacity: 2205 lbs
- » Min. Height: 15"
- » Claw Width: 12"
- » Weight: 71 lbs

Part #	Description
8010205	Weha R1000 Plus

**Important: Carefully read the operating instructions. Do not use to lift waxed and frozen slabs.**

# SLAB LIFTERS

## Weha R1000

Heavy-duty slab grab, very robust with galvanized surface. Jaws and other contact surfaces are completely rubber coated. A return spring keeps it in the vertical position. When the slab is being put down, a locking mechanism (patented) locks automatically.

- » Load capacity: 2205 lbs
- » Min. Height: 25"
- » Max. Height: 32"
- » Claw Width: 0.8 - 8"
- » Claw Surface: 8 x 8"
- » Weight: 46 lbs

Part #	Description
8010210	Weha R1000

**Important: Carefully read the operating instructions. Do not use to lift waxed and frozen slabs.**

## Weha R1000 Jumbo

For massive stone and smaller blocks of stone. With locking automatism. Perfect protection: jaws completely galvanized prevent scratches on the valuable materials. Additional protection is given by the rubber coating. With return springs on the jaws.

- » Load Capacity: 2205 lb
- » Min. Height: 25"
- » Max. Height: 44"
- » Claw Width 10 - 20"
- » Claw Surface: 8 x 8"
- » Weight: 93 lbs

Part #	Description
8010216	Weha R1000 Jumbo

**Important: Carefully read the operating instructions. Do not use to lift waxed and frozen slabs.**

## Weha R1500

Heavy-duty slab grab, very robust with galvanized surface. Jaws and other contact surfaces are completely rubber coated. A return spring keeps it in the vertical position. When the slab is being put down, a locking mechanism (patented) locks automatically.

- » Load Capacity: 3307 lbs
- » Min. Height: 25"
- » Max. Height: 33"
- » Claw Width: 0.8 - 10"
- » Claw Surface: 8 x 7"
- » Weight: 93 lbs

Part #	Description
8010215	Weha R1500

**Important: Carefully read the operating instructions. Do not use to lift waxed and frozen slabs.**

# SLAB LIFTERS

## Weha Riba Series Cable Scissor Lifters

The Weha Riba Series Cable Scissor Lifters are perfect for picking up any stone slab or steel plate from a horizontal position and lifting it to a vertical position. Likewise, the Riba Series Cable Scissor lifters will take a steel plate or slab and transition from a vertical position and lower it to a horizontal position.

The Weha Riba Series Cable Scissor Lifters are operated by 2 super strong steel wire cables and roller bearings. So when lifting and tilting material the cable is always tight and creating pressure so that the Riba Scissor Lifter never releases the material. A cable guide guarantees slab lowering without a problem. The 2 cables have eye loops for eye hooks, clamps, shackles etc. Rubber coated jaws. The Riba Scissor Lifter can be used with Fork Lift Booms, Jib Cranes, Over Head cranes, etc. Fully hot dipped galvanized, the Riba Slab Lifters will last for many, many years. Riba Scissor Slab Grab lifters come with 3" Diameter Rubber Grip Pads that create a super strong grip on the stone. These grips can easily be replaced when worn out.

### Weha Riba 1

Light and manageable slab grab for vertical transport of slabs.

- » Load Capacity: 1102 lbs
- » Min. Height: 12"
- » Claw Width: 0 - 3"
- » Weight: 20 lbs

### Weha Riba 2

Mid-heavy slab grab for vertical transport of slabs.

- » Load Capacity: 2646 lbs
- » Min. Height: 16"
- » Claw Width: 0 - 6"
- » Weight: 49 lbs

### Weha Riba 3

Heavy slab grab for vertical transport of slabs.

- » Load Capacity: 3087 lbs
- » Min. Height: 20"
- » Claw Width: 0 - 11"
- » Weight: 64 lbs

Part #	Description
8010235	Weha Riba 1
8010240	Weha Riba 2
8010245	Weha Riba 3

**Important: Carefully read the operating instructions on all slab lifters before use. Do not use to lift waxed and frozen slabs. We recommend lifting one slab at a time.**

## Weha Green Rubber Replacement Pads for Lifters

Part #	Description
8020613	Green Replacement Pads for Lifters

- » 3 3/8" diameter
- » 5/8" thick
- » 3/8" diameter hole for bolts

## Weha Telescopic Forklift Boom

- » Load Capacity: 4000 lbs
- » Telescoping Length: 80" to 144"
- » Fork Pockets: 24" on centers
- » Usable Fork Pocket Height: 2 1/2"
- » Usable Fork Pocket Width: 7 1/2"
- » Finish: Painted Yellow

### Hook Position

- » 144" - 1750 lbs
- » 132" - 2000 lbs
- » 120" - 2250 lbs
- » 108" - 2500 lbs
- » 96" - 2750 lbs
- » 84" - 3000 lb

Part #	Description
123661	Weha Telescopic Boom

## Weha Adjustable Angle Telescopic Boom

We transfer your fork-lift truck into a mobile crane! With telescopic extensions, 4 times adjustable in height, suitable for loading work and transportation. Stabilizer. Completely hot galvanized. Universal, suitable for any fork-lift truck. New: more lifting possibilities through new hook positioning. A safety chain protects it from slipping off the fork.

Part #	Description
8010608	Weha Adjustable Angle Telescopic Boom

- » Max. load capacity: 5515 lbs
- » Max. reach: 15 ft
- » Weight: 551 lbs

## Weha Swivel Hook and Shackle

Swivel hook for forklift booms to attach lifters, cables, slings, etc. Safety push metal clip to prevent attachments from slipping or bouncing out. Grad 80 Equipped with Brass bushing SIKA-SWIVEL HOOK type WHS 10-8 Safety pin in top thread to prevent nut from backing out during use. Comes with shackle to attach to boom.

Part #	Description
119791	Weha Swivel Hook and Shackle

- » Weight capacity: 3.2 ton / 6400 lbs
- » Jaw Opening: 2"
- » Weight: 15 lbs

## Swivel Hook for Fork Lift Booms and Lifter

The Weha Swivel Hook is designed to lock into the Fork lift Boom and attach cables, Abaco Lifters, Scissor Lifters, Vacuum Lifters, to the Boom. The Weha Swivel Hook allows for rotation of Granite and Stone Slabs.

Part #	Description
8010226	Weha Swivel Hook for Fork Lift Booms & Lifters

- » Weight capacity: 3300 lbs

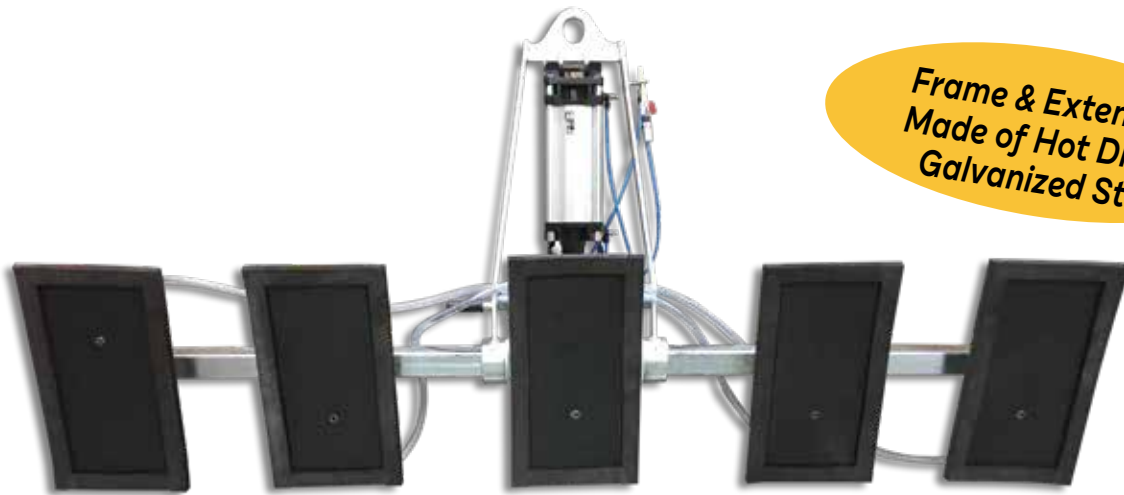

## Cable Connect Sling

Part #	Description
8010227	Cable Connect Sling

# MULTIPAD VACUUM LIFTER

Weha A1500 Multipad Vacuum Lifter with Power Tilt Part #138514

Frame & Extensions  
Made of Hot Dipped  
Galvanized Steel!

The Weha A1500 5 Pad Vacuum Lifter was the suggestion of a stone fabricator that was needing to do a lot of panels for a commercial job. He needed a single pad lifter to handle the smaller panels but also needed his slab lifter for full slabs, islands, and typical fab shop use. The result of making this lifter for him has created the most versatile multifunctional stone vacuum lifter on the market.

What makes the Weha A1500 Vacuum Lifter so versatile and the Best Vacuum Lifter for Stone? It starts with all the ways the Weha A1500 Vacuum Lifter can be configured. You are getting several vacuum lifters in one:

**1 Single Pad:** The vacuum lifter base has all the vacuum systems, connections, power tilt, shut off valves, and functions. The base also has the center pad. In this configuration the A1500 Vacuum Lifter is a single pad power tilt vacuum lifter with a weight capacity of 300 lbs. The vacuum pad dimension is 12 1/2" x 22 1/2". This allows the vacuum pad to lift small size panels (anything smaller than this can be moved by hand). Without having the extension bars attached the total width of the lifter is only 36". This allows the lifter to swing in a tight radius, load carts, dollies, line machines, etc.

**2 Pad:** Take off the center pad and put 2 pads on the base or add the extension bars and spread them out up to 104" wide. The 2 pad option gives the vacuum lifter a weight capacity of 600 lbs

**3 Pad:** 3 Pad can be attached to the base only or add the 2 extension bars and spread them out linear up to 104" wide. The 3 pad option gives the vacuum lifter a weight capacity of 900 lbs

**4 Pad:** Option 1: With the extension bars run the 4 pads linear up to 104" wide. Option 2: Remove the Center Pad, add the cross bars to the extension bar and spread them out up to 104" wide x 48" Spread. The 4 pad option gives the vacuum lifter a weight capacity of 1200 lbs

**5 Pad:** Option 1: With the extension bars run the 4 pads linear up to 104" wide. Option 2: Add the cross bars to the extension bar and spread them out up to 104" wide x 48" Spread. The 5 pad option gives the vacuum lifter a weight capacity of 1500 lbs

**Swivel Vacuum Pads:** Each vacuum lifter pad is mounted on a swivel that allows it to spin on 90 degree locks. the pad can be in vertical position and then turned to a horizontal position. The vacuum pads can also be placed in 45 degree angle positions. The ability to swivel and move the vacuum pads give greater flexibility in placing the pads on the stone. L shaped pieces, going around sinks, etc are controlled much easier by swiveling the pads.

**5 Shut Off Valves:** Every vacuum cup has its own dedicated shut off valve. These red on/off valves are set directly in front of the operator to easily control which pads the operator wants to use.

# MULTIPAD VACUUM LIFTER

**Quick Disconnect lines:** Changing from 1 pad to 3 pads, to 5 pads is extremely easy. Simply quick disconnect the air line from the on/off valve and slide the vacuum cup with its hose off of the lifter. Quick and easily.

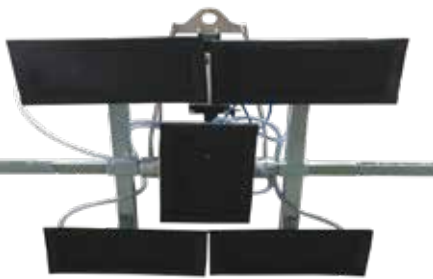

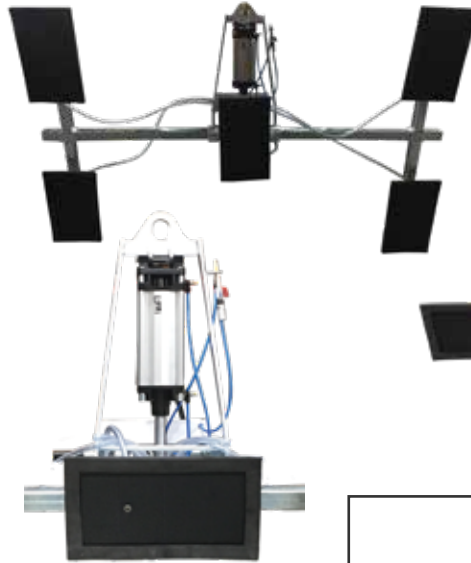

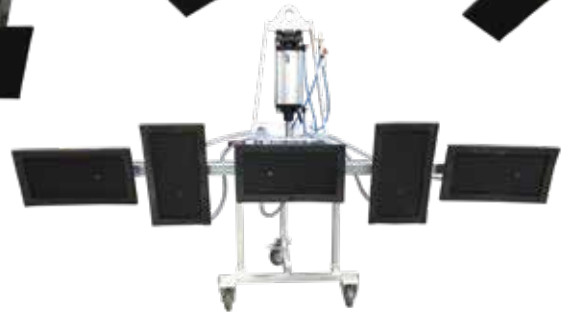

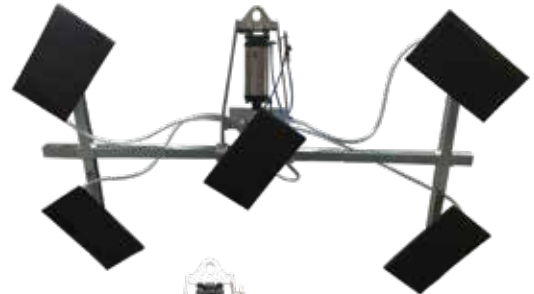

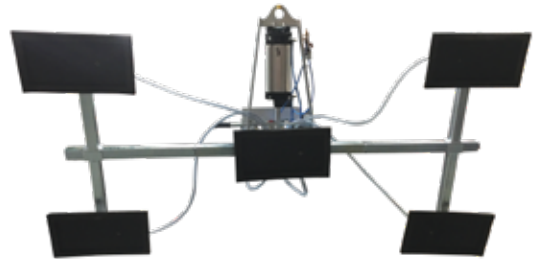

**Power Tilt for Vertical and Horizontal Movement:** The Weha A1500 Vacuum Lifter comes standard with power tilt. This allows horizontal to vertical (and vice versa) movement with a simple control lever next to the hand of the operator.

The Weha A1500 Pneumatic Air Vacuum Lifter is an air venturi vacuum lifter. Requires a minimum of 58 PSI at 4 CFM or 4 bar 5 Vacuum Cup weight capacity each: 300 lbs Power vertical/horizontal tilt from 0-90 degrees Large pressure gauge directly in front of operator to continually monitor air pressure at all times.

The Weha A1500 Vacuum Lifter comes complete with A1500 Base Vacuum Lifter, 2 Extension Bars, 2 Cross Bars and 5 Vacuum Pads. Optional Stand for Vacuum Lifters are almost a must if you plan to disconnect the vacuum lifter and place on the ground. This is to protect the vacuum cups.

## Weha A1500 Venturi Air Vacuum Lifter Specifications:

- » Load Capacity Horizontal: 1500 lbs (individual pads rated for 300 lbs ea.)
- » Load Capacity Vertical: 1500 lbs
- » Minimum Pad Spread 36" x 39"
- » Maximum Pad Spread: 108" x 58"
- » Height with power tilt: 39"
- » 5 Suction Pads Each: 12 1/2" x 22 1/2"
- » Length of Base without extension: 36"
- » Length of Lifter with Extension Bars installed: 94"
- » Length of Operating Cross Bars: 48"
- » Weight: 203 lbs

## Vacuum Lifter Stand

Part #	Description
140464	Vacuum Lifter Stand

# UNIPAD VACUUM LIFTERS

Weha Venturi System Unipad Vacuum Lifters are premium quality vacuum lifters designed to last for years, with very easy maintenance and a very affordable price. Great for granite, marble, all natural stones, engineered stone, glass, metal, etc. These quality lifters are produced in Konigsbrunn, Germany.

We carry a full line of parts and accessories to quickly service our vacuum lifters.

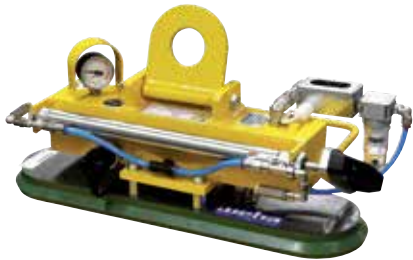

**Silicone Vacuum Pads for Engineered Stone**

**Type UNIPAD for polished & rough upper surfaces**

**Standard Vacuum Pads in wear resisting design (steel core with vulcanized surface rubber)**

## **Weha EP300 Unipad Hand Pump and Air #116041**

- » Comes with both hand pump and air connection
- » Will build and maintain pressure without air or external power
- » Load Capacity Horizontal: 661 lbs
- » Load Capacity Vertical: 331 lbs
- » Suction Plate: 21.3" x 6"
- » Weight: 33 lbs

## **Weha EP600 Unipad Hand Pump and Air #115764**

- » No compressor required when using the hand pump
- » Double acting hand pump
- » Load Capacity Horizontal: 1323 lbs
- » Load Capacity Vertical: 661 lbs
- » Suction Plate: 24" x 10"
- » Weight: 40 lbs

## **Weha EP800 Unipad Hand Pump and Air #118674**

- » Runs off of a small compressor with a min 4 CFM and 90 PSI
- » No compressor required when using the hand pump
- » Load Capacity Horizontal: 1764 lbs
- » Load Capacity Vertical: 882 lbs
- » Suction Plate: 28" x 12"
- » Weight: 73 lbs

## **Weha T300 Unipad Pneumatic/Air Only #8010296**

- » Comes with air connection only
- » Runs off of a small compressor with a min 2 CFM and 60 psi
- » Load Capacity Horizontal: 661 lbs
- » Load Capacity Vertical: 331 lbs
- » Suction Plate: 21.3" x 6"
- » Weight: 33 lbs

## **Weha T600 Unipad Pneumatic/Air Only #115905**

- » Comes with air connection only
- » Runs off of a small compressor with a min 2 CFM and 60 psi
- » Load Capacity Horizontal: 1323 lbs
- » Load Capacity Vertical: 661 lbs
- » Suction Plate: 24" x 10"
- » Weight: 40 lbs

## **Weha T800 Unipad Pneumatic/Air Only #118656**

- » Comes with air connection only
- » Runs off of a small compressor with a min 2 CFM and 60 psi
- » Load Capacity Horizontal: 1764 lbs
- » Load Capacity Vertical: 882 lbs
- » Suction Plate: 28" x 12"
- » Weight: 73 lbs

## Weha Counter Top Support Bracket - Flat

Weha Counter Top Support Brackets are made to replace Corbels on granite, marble, quartz, quartzite, ES, and concrete counter top overhangs and kitchen islands. Made to be placed between 18"-24" apart, most installations require 3 so Weha has conveniently packed the counter top support braces in packs of 3. This gives 4 screws per counter top brace bracket. Each set of 3 counter top brackets are shrink wrapped with the screws. This allows the installer to grab a counter top bracket set and take it to the install without scratching the brackets or the brackets sliding around in the truck, and not having to remember to grab the screws. Simply take into the kitchen, open the pack, and everything is provided for a quick, scratch free install.

Each Counter Top Support Bracket comes with 6 countersink holes. This allows the bracket to be adjusted up to 2 1/4" if needed. The provided screws will finish flush with the granite support bracket. Each Counter Top Support Bracket is powder coated gloss black for a high end black polished finish. One edge of the counter top brace is flat and the other end is back beveled with slightly rounded corners. There are no sharp edges for the homeowner to scratch or cut themselves. And the bevel provides a nice touch transition from the bracket to the stone. Weha also decided to go with a full 1/4" thick counter top brace bracket. The 3/16" brackets are just too flimsy and allows too much flex in the brace. However, the 1/4" thick counter top bracket provides a solid stiff bracket that will fully support the overhang without flexing.

Part #	Description
143160	Weha 8" Counter Top Support Brackets / pack of three
138401	Weha 10" Counter Top Support Brackets / pack of three
138396	Weha 12" Counter Top Support Brackets / pack of three
143161	Weha 14" Counter Top Support Brackets / pack of three
138397	Weha 15" Counter Top Support Brackets / pack of three
143162	Weha 17" Counter Top Support Brackets / pack of three
138398	Weha 20" Counter Top Support Brackets / pack of three

Weha produces the Counter Top Support Bracket at 2 1/2" wide. This width gives plenty of structural support. And when placed at seams it gives a full 1 1/4" wide support on each piece of stone. Weha Counter Top Support Brackets can be used with granite, marble, engineered stone, quartz, quartzite, concrete, and all substrates. All Weha Counter Top Support Brackets provide the correct and proper support needed for granite and stone overhangs.

- » 2 1/2" wide
- » 1/4" thick
- » 3 per set
- » Includes 12-2" screws

## Weha Counter Top Support Bracket - L

The Weha 10" L Bracket Counter Top Support Bars are made for granite, marble, quartz, quartzite, engineered stone, concrete counter tops. The L Countertop Support Brackets are made to mount on 2 x 4 knee or pony walls, as well as full island support walls. Another excellent application is for floating vanity tops. The L bracket can be screwed to the stud and then drywall or mudded over for an invisible look. The L Countertop Support Bracket comes with predrilled recessed screw holes. 4 recessed screw holes on the top and 3 recessed screw holes down the back. Screws can go in either or both sides. The L Countertop Support Bracket is made using premium 1/4" thick steel x 2 1/2" wide for robust support with no flexing. The L Countertop Support Brackets are finished with a high gloss black finish with a beveled end.

- » 2 1/2" wide
- » 1/4" thick
- » 3 per set
- » Includes 12-2" screws
- » L length: 4 3/16"
- » Inside L length: 3 11/16"

Part #	Description
140138	Weha 10" Counter Top Support L Brackets / pack of three
140203	Weha 12" Counter Top Support L Brackets / pack of three
140139	Weha 15" Counter Top Support L Brackets / pack of three

# INSTALLATION

## Weha Z Bracket Sink Clips

Weha Z Brackets for mounting undermount sinks. Z brackets can be used to directly attach sinks using quick set adhesives or they can be used with sink anchors and screws to mount kitchen sinks and bathroom vanity sinks.

Part #	Description
138402	Weha Z Bracket for Sink Clips / 50 per bag / 10 bags per case

## Weha Pop-It Universal Sink Clips

Weha Pop-It Universal Sink Clip for attached undermount kitchen sinks and ceramic and porcelain vanity sinks to granite, marble, quartz, quartzite, concrete, and other stone counter tops and vanities. Simply drill an 8mm hole and drop the Weha Pop-It screw into the hole. Tighten the other screw down onto the lip of the vanity or kitchen sink. Once the screw tightens down on the sink rim the Pop-it will wedge into the hole and self lock for a safe and secure bowl mount.

Made out of heavy duty gauge stainless steel, the Weha Pop-it Universal Sink Clip will not rust or fatigue over time. If the sink ever needs to come out or be replaced, simply loosen the screw and the Weha Pop-it will come out and can be reused to mount the new replacement sink. No glue necessary.

Will work with sink rims up to 1" thick.

Part #	Description
138399	Weha Pop-It Universal Sink Clips / 50 per bag / 10 bags per case

## Weha T-31 Anchor Bolt 3/16" x 1/4" x 1 1/2"

The Weha T-31 Anchor Bolt is an Stainless Steel and will not rust. This 3/16" T Anchor Bolt works perfect with the Weha T-31 Anchor Machine, T-31 Diamond Anchor Bit, and the Weha Z clip. T-31 Anchor Bolt includes lock washer, washer and nut.

Part #	Description
142817	Weha T Anchor Bolt 3/16" x 1/4" x 1 1/2" / Bag of 50

## Weha T-31 Vacuum Brazed Anchor Bits

The Weha T-31 Vacuum Brazed Diamond Anchor Bit are made to be used on the Weha T-31 Anchor Machine or any other T-31 Anchor Machine that accepts a 1/4" diameter T-31 Anchor Bit. These bits will make perfect anchor slots in marble, granite, quartz, engineered stone, concrete, and other natural or man-made stone. Depending on materials the Weha T-31 Diamond Anchor Bit will get between 100-150 slots before it needs to be replaced.

Part #	Description
30151	Weha T Anchor Bit 2" x 3/16" x 1/4" shaft
30152	Weha T Anchor Bit 2cm 3/16" x 1/4" shaft

# VACUUM CUPS / SEAM SETTERS

## Weha Suction Assembly

Weha Suction Assembly consists of 2 capped aluminum rails and 12 double suction cups. It supports and protects your kitchen and bathroom tops in transport, reducing the chance of breaking the top. Special aluminum profiles allow a safe placement of the suction cups, which are individually adjustable.

Part #	Description
SET080040	Weha Suction Assembly

- » Rail Length: 7'
- » 12 - Double Cups

## Weha Replacement Parts for Suction Cup Assembly

The Replacement Double Suction Cup for Suction Cup Assembly are designed specifically for the Weha Suction cup assembly. They have the hook and lever on the underside of the handle to clamp onto the special grooves in the rail of the Suction cup assembly so that they don't come off. For standard double suction cups, please see Part# 8010423.

The Weha 7' replacement bar for the Weha Suction Cup Assembly is to replace a damaged or lost bar that came with the Weha Suction Cup Assembly set.

Part #	Description
8010422	Weha Replacement Cup for Suction Cup Assembly
8010414	Weha 7' Replacement Bar - Each

## Weha Double Suction Cup for Stone, Tile and Glass

The Weha Double Suction Cups are excellent light weight cups that have a nice weight capacity for moving cut and finished pieces of stone, tile, and glass.

Part #	Description
8010423	Weha Double Suction Cups

- » Load Capacity: 176 lbs
- » Suction Plates: 2 - 5"
- » Weight: 1.4 lbs

## Weha Ratchet Seam Setter & Leveler

Fine adjustments can be made by means of a micro adjustment screw creates a perfectly tight and level seam. It is also suitable for gluing broken parts. The vacuum is strong enough to allow the adhesive to cure before losing pressure. Comes with a heavy duty blowmold carry case.

**Level Equalizer**

- » Suction Plate: 2 - 8"
- » Weight: 12.1 lbs
- » Includes heavy duty molded case

Part #	Description
8010418	Weha Ratchet Seam Setter & Leveler

# VACUUM CUPS

## Weha Vacuum Cups

Heavy-duty and robust vacuum cups with high load capacity, especially for heavy and big work pieces with smooth surfaces. Vacuum control and safe work thanks to a warning marking.

### 8" Metal Vacuum Cup

- » Load capacity horizontal: 265 lbs
- » Suction plate diameter: 8"
- » Weight: 3 lbs

### 10" Metal Vacuum Cup

- » Load capacity horizontal: 331 lbs
- » Suction plate diameter: 10"
- » Weight: 3 lbs

### 8" Plastic Handle Vacuum Cup

- » Load capacity horizontal: 175 lbs
- » Suction plate diameter: 8"
- » Weight: 2.5 lbs

Part #	Description
VZ080104	8" Plastic Handle Vacuum Cup
8010421	8" Metal Vacuum Cup
8010416	10" Metal Vacuum Cup

## Weha 8" Grey Rubber Vacuum Cup

- » Load Capacity: 176 lbs
- » Non-marking
- » Does not leave spots/marks on stone
- » Excellent for ES stone, composite materials, marbles, all granites (especially white or light colored stone)

Part #	Description
122815	Weha 8" Metal Grey Rubber Vacuum Cup

## Weha Triple Suction Cup

- » Suction Plates: 3 - 4.75"
- » Horizontal Load Capacity: 220 lbs
- » Vertical Load Capacity: 110 lbs

Part #	Description
104552	Weha Triple Suction Cup

## Weha Yellow Fiberglass Rodding Stand

The Weha Yellow Fiberglass Rodding Stand works perfect for white fiberglass rodding and the Weha Carbon Fiberglass Rodding. The Weha Yellow Fiberglass Rodding Stand will hold rodding up to 330' rolls. The real advantage of the Weha Yellow Fiberglass Rodding Stand over others is the ability for it to ship broken down for much less expensive shipping charges. Easy 5 minute assembly. With assembly only taking about 5 minutes, this will save well over \$70.00 in shipping charges over fiberglass rodding stands that are one solid piece. This makes the Weha Yellow Fiberglass Rodding Stand the most affordable Rodding Stand on the market! Stable, sturdy construction of painted steel.

Part #	Description
137205	Weha Yellow Rodding Stand

## Weha White Economy Fiberglass Rodding

Weha White Economy Rodding is not as strong as the other Weha Carbon Fiberglass or Steel Carbon Fiberglass Rodding. However, it does add substantial strength over not using rodding at all. White Rodding will not rust over time and will mechanically bond to the adhesive rather than just surrounding it like metal rodding.

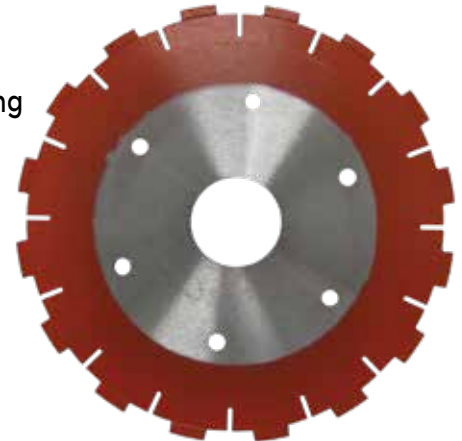

Part #	Description
8160066	Economy Rodding 1/8" x 3/8" x 328'

## Weha 10" (250mm) x 5mm Rodding Blade

Weha 10" x 5mm Rodding Blade is made for saws, such as the GMM, that has Rodding capabilities. Can be used for making rodding slots on granite, marble, quartz, quartzite.

Part#	Description
107880	Weha 10" (250mm) x 5mm Rodding Blade

## Weha Diamond Turbo Rodding Blades

Weha Diamond Turbo Rodding Blade for granite, marble, engineered stone, quartz, quartzite, concrete counter tops. The Weha Diamond turbo rodding blade is designed to increase speed in cutting out the rodding channel for the 1/8" thick fiberglass and metal rods. With a full 10mm height of diamond and cooling holes, the Weha Turbo Rodding Blade cuts as fast as a turbo blade but making a 1/4" wide square notch for the rods. The Granite Rodding Turbo Blade makes up 2 Weha EB blades separated by an 1/8" thick of metal-all welded together. When the blade is cutting, it blows out the stone that goes between the blades, leaving a perfect 1/4 wide groove.

Part#	Description
50287	Weha 4" x 1/4" Diamond Turbo Rodding Blade
50289	Weha 5" x 1/4" Diamond Turbo Rodding Blade

- » 7/8" x 5/8"
- » May be used wet
- » Max RPM: 12,200

# RODDING

## Weha Steel Carbon Fiber Rodding

**Steel Carbon Fiber Rodding 1/8" x 3/8" x 330' for granite, marble, all natural stones, Engineered stones and Quartz counter tops**

Weha has taken Steel Rodding and encapsulated it with 8 Strand premium true grade fiberglass and then reinforced with Carbon Fiberglass. By having the steel rodding completely enclosed in the carbon fiber, there is virtually no chance of rust from the steel, like traditional steel rodding. This Triple layer granite rodding material produces incredible strength superior to standard steel rodding, without the worry of rust. Additionally, the Weha Steel Carbon Fiberglass Rodding is specifically designed with multiple grooves that run the length of each side of the rodding. These adhesive grooves are made to allow maximum locking bond and adhesion to the glue. This adds additional strength to the steel Carbon Fiberglass Rodding. Because the Weha Steel Carbon Fiberglass Rodding uses true premium grade fiberglass (not extruded plastic in the shape of rodding) the glue bonds to the fiberglass.

Part #	Description
133229	Weha Steel Carbon Fiber Rodding 1/8" x 3/8" x 330'

## Weha Carbon Fiber Rodding

**Carbon Fiberglass Rodding 1/8" x 3/8" x 328' roll for Granite, Marble, Engineered Stone, Quartzite, all Natural Stones**

Weha Carbon Fiber rodding is the latest technology in fiberglass rodding for granite, all natural stones, engineered stones, and quartz counter top applications. Made with the highest concentration of fiberglass strands throughout the entire profile makes the weha carbon granite rodding, in itself, much stronger than traditional white fiberglass rodding for stone.

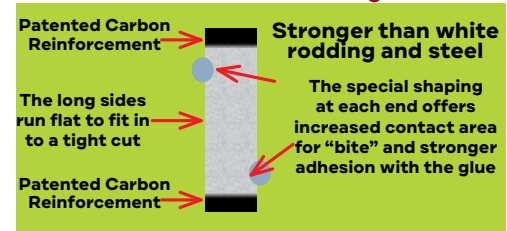

**25% Stronger than standard rodding**

Weha has added an additional top and bottom layer of high tensile strength Carbon on both sides to drastically increase the strength even more! This makes the Weha Carbon Fiber Rodding the Strongest granite Fiberglass Rodding that can be used.

Part #	Description
8160061	Flat section: 1/8"x3/8" - Length: 328'
126487	Flat section: 1/8"x1/4" - Length: 328'

### Carbon Fiber Advantage

## Weha Carbon Fiber Rodding Bar

**Carbon Fiberglass Rodding 1/8" x 3/8" x 48" bar for Granite, Marble, Engineered Stone, Quartzite, all Natural Stones**

The Weha Carbon Fiber Granite Rodding Bars are now pre cut in 4' (48") lengths with 100 carbon fiber rodding sticks per bundle. No more rodding stands, rolls being unraveled and laying all over the shop.

With a 48" length, 1 stick will extend past any sink. Simply cut with a grinder or bolt cutters to the length you need and glue it in.

Part #	Description
140610	1/8" x 3/8" x 48" Carbon Fiber Rodding Bar 100/box

# MISC / ACCESSORIES

## Sleeve Protectors with Elastic Waist

Weha Stone Sleeves are outstanding for colder weather. Keeps the arms completely dry. With an elastic wristband, it is soft and comfortable around the wrist but does not allow water to run under. The top has a velcro arm band to keep the sleeve up and comfortable.

- » Made of rubberized fabric
- » With Velcro fastening on the upper arm pad
- » Durable quality
- » Length: 20"

Part #	Description
8152016	Sleeve Protectors with Elastic Waist

## Weha Black Rubber Sleeve Protectors

Weha Waterproof Sleeve Protectors are the latest version in full sleeve water protection. The soft expandable rubber near the wrists make these sleeves super comfortable and keep the water from coming up the arm. Also, the waterproof sleeve protectors are made to come all the way to the shoulder for full arm protection. With the adjustable strap that goes behind the back and the sleeves will stay fully up on the shoulder.

- » Adjustable
- » Soft expandable rubber
- » Super comfortable
- » Full arm protection

Part #	Description
137490	Weha Black Rubber Sleeve Protector

## Weha Heavy Duty Waterproof Grey Apron

Weha's latest Apron is made for comfort. With 2" wide cross Clip Straps, the Weha Apron fits comfortable on the shoulders and not on the neck. The Weha Apron fits comfortable under the arm and around the body. This keeps it close to the body from arms down to the legs. This provides easier movement and best water protection.

At 46" in length, it fits the average fabricator just perfectly. This length covers the boot well but still leaves enough space from the floor to keep it from touching.

- » 2" wide cross clip straps
- » Sits across shoulders not neck
- » Thick, durable material will last 3-4 times longer than most aprons on the market
- » High working comfort
- » Dimensions: 46" long
- » Color: Grey

Part #	Description
137468	Weha Heavy Duty Grey Apron

## Weha Clip Apron

- » With spring clip
- » Without a carrier belt for maximum comfort at work
- » Dimensions: 55" x 36"
- » Color: White

Part #	Description
8152112	Work Apron Weha Clip

## Work Velcro Apron

The Weha USA Water Proof Apron is a heavy duty apron for granite fabrication shops. The Weha USA Water Proof Aprons come with 2 strips of velcro down the front to hold diamond polishing pads, felt pads, and other hook and loop items. With zippered pockets with water proof flaps on each side allow the fabricator to store useful items.

- » Dimensions: 34" x 48" long
- » Color: Black

Part #	Description
VD080388	Weha Velcro Apron

# MISC / ACCESSORIES

## Weha 4" C Clamp

4" C clamps are great for laminating, keeping stone from sliding on work tables, etc

- » Forged steel
- » 1200 lb capacity
- » 4" opening
- » 3" depth

Part #	Description
8135	Weha 4" C Clamp

## Casters for Work Table

Part #	Description
8020492	Caster without Brake - each
8020481	Caster with Brake - each

## Waste Bags for Sludge Dehydrators

29' x 50" made of woven polyester

Part #	Description
7240032	Waste Bag for Sludge Dehydrators

## Weha Stone Waste Bags

Use for stone wastes, paving-stones, sand, split, gravel.

Small dead weight, high ultimate tensile strength, fully recyclable. Weha Stone Waste Bag with handle loops allow the waste bags to be picked up with forklifts, or put in frames for easily loading and removal.

Weight Capacity: 1.5 Tons  
Size: 35" x 35" x 35"

Part #	Description
8010800	Weha Stone Waste Bag w/handles

## Weha Stone Slab Wedge

The Stone Slab Wedge is designed to separate bundles so that the clamps can pick up a slab.

Part #	Description
122817	Weha Slab Wedge

## Wheels for A-Frame Transport Carts

- » Designed for Weha Transport Carts
- » 2 locking swivel
- » 2 fixed
- » 8" wheels

Part #	Description
133275	Casters for Weha Transport Cart-Set

## Frankfurt Plastic Shoe / Holders

Part #	Description
VD070045	Complete Frankfurt Plastic Shoe
6190601	Left Holder
6190602	Right Shoe

# MISC / ACCESSORIES

## Weha Medium Density Felt Pads

Part #	Description
VZVFP4	4" Weha Medium Density Felt Pads
VZVFP5	5" Weha Medium Density Felt Pads

## Medium Density Felt Wheel

The Weha Thick Medium Density Felt Wheel is used with polishing powders, waxes, etc on granite, marble, engineered stone, quartzite, and other natural stones.

» 5" x 1" x 5/8-11

Part #	Description
4442	5" Medium Density Felt Wheel

## Bridge Saw Table Rubber Mat

- » 39" x 39" x 3/4"
- » Anti-fatigue
- » Ergonomic
- » Made of rubber

Part #	Description
128648	Bridge Saw Table Rubber Mat

## SKM Metal Tip Stone Marker

SKM metal tip markers are perfect for marking slabs, core holes, sink cut outs, selecting slabs etc.

Works on granite, marble, limestone, slate, all natural stone and engineered stone.

Part #	Description
33901	SKM White Metal Tip Stone Marker
33903	SKM Red Metal Tip Stone Marker

## Granite & Stone Foam Rubber Squeegee

Perfect for pulling water off of counter tops, islands, vanities, etc. during the fabrication process. Made with a steel body double layer foam.

Part #	Description
102870	18" Granite & Stone Foam Rubber Squeegee
102871	25" Granite & Stone Foam Rubber Squeegee

## Professional Marker Set

Perfect for granite, marble, engineered stone, quartz and all natural stones. Durable enough to not wash off during fabrication. Writes through standing water.

- » 2 blue refill pens
- » 1 box of red markers
- » 1 box of black markers
- » 1 box of yellow markers

Part #	Description
4090160	Professional Marker Set
4090155	Black Refill/Hardness HB/Pack of 5
4090156	Red Refill/Hardness HB/Pack of 5
4090157	Yellow Refill/Hardness HB/Pack of 5

## EZ Dish Washer Bracket

The absolute best way to secure dish washers. Sturdy metal construction Attaches to the cabinet with screws. Can also be attached to countertop with adhesive. Sold as individual pieces. There are 25 pieces per box

Part #	Description
4503	EZ Dish Washer Bracket

# SANDPAPER

Weha offers a variety of very high quality silicon carbide sandpaper. Weha has researched sandpaper for nearly 3 years to find uncompromising, consistent, high-quality E weight silicon carbide velcro backed sandpaper that we can put our name on. Weha is proud to offer this line of velcro sandpaper to the stone fabricator, knowing it will meet the high expectations that fabricators want and deserve. Weha Silicon Carbide Sandpaper is outstanding on marble, travertine, limestone, even granite, and engineered stone.

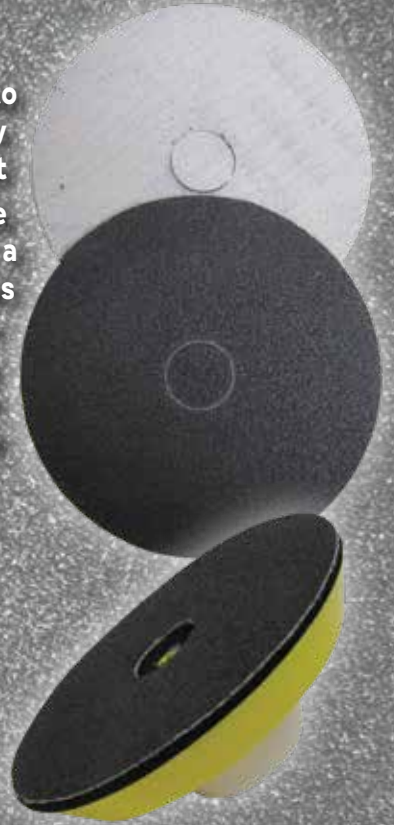

## 4" Silicon Carbide Velcro Sandpaper with Knock Out Center

Weha line of 4" hook and loop Silicon Carbide Sandpaper with knockout center is equal to all the major brand sandpapers available on the market today. Pure grade silicon on heavy weight paper allows long lasting sanding and polishing in either a wet or dry environment

Part #	Description
146003	4" 40 Grit with Knock Out Center Box of 50
146004	4" 60 Grit with Knock Out Center Box of 50
146005	4" 80 Grit with Knock Out Center Box of 50
146006	4" 120 Grit with Knock Out Center Box of 50
146007	4" 220 Grit with Knock Out Center Box of 50
146008	4" 320 Grit with Knock Out Center Box of 50
146009	4" 400 Grit with Knock Out Center Box of 50
146010	4" 600 Grit with Knock Out Center Box of 50
146011	4" 800 Grit with Knock Out Center Box of 50
146012	4" 1200 Grit with Knock Out Center Box of 50

The velcro silicon carbide sandpaper now comes with a removable knockout center. This gives the flexibility to use the paper dry complete without removing the center hole or pushing out the knockout out center and have center water feed.

- » Can be used both wet and dry
- » Hook and looped back
- » Grits 40 - 1200 in stock

## 5" Silicon Carbide Velcro Sandpaper

Weha line of 5" hook and loop Silicon Carbide Sandpaper is equal to all the major brand sandpapers available on the market today. Pure grade silicon on heavy weight E paper allows long lasting sanding and polishing in either a wet or dry environment.

Part #	Description
4421	5" 40 Grit Silicon Carbide Velcro Sandpaper Box of 100
4422	5" 60 Grit Silicon Carbide Velcro Sandpaper Box of 100
4423	5" 80 Grit Silicon Carbide Velcro Sandpaper Box of 100
4424	5" 120 Grit Silicon Carbide Velcro Sandpaper Box of 100
4425	5" 220 Grit Silicon Carbide Velcro Sandpaper Box of 100
4426	5" 320 Grit Silicon Carbide Velcro Sandpaper Box of 100
4427	5" 400 Grit Silicon Carbide Velcro Sandpaper Box of 100
4428	5" 600 Grit Silicon Carbide Velcro Sandpaper Box of 100

- » Can be used both wet and dry
- » Hook and looped back
- » Grits 40 - 600 in stock

### Silicon Carbide Velcro PSA Sandpaper with Sticky Back

Weha Silicon Carbide Sandpaper is outstanding on marble, travertine, limestone, even granite, and engineered stone. Weha line of 5" PSA Sticky Back Silicon Carbide Sandpaper is equal to all the major brand sandpapers available on the market today.

Pure grade silicon on heavy weight paper allows long lasting sanding and polishing in either a wet or dry environment

Part #	Description
142215	5" 40 Grit PSA Sticky Back Sandpaper Box of 100
142216	5" 60 Grit PSA Sticky Back Sandpaper Box of 100
142217	5" 80 Grit PSA Sticky Back Sandpaper Box of 100
142218	5" 120 Grit PSA Sticky Back Sandpaper Box of 100
142219	5" 220 Grit PSA Sticky Back Sandpaper Box of 100
142220	5" 320 Grit PSA Sticky Back Sandpaper Box of 100
142221	5" 400 Grit PSA Sticky Back Sandpaper Box of 100
142222	5" 600 Grit PSA Sticky Back Sandpaper Box of 100

All of the Weha 5" PSA Sticky Back Silicon Carbide Sandpaper grits are boxed in packs of 100 pieces per box. However the cost of Weha box of 100 silicon carbide sandpaper is nearly the price of other name brand silicon carbide sandpaper packs of 50.

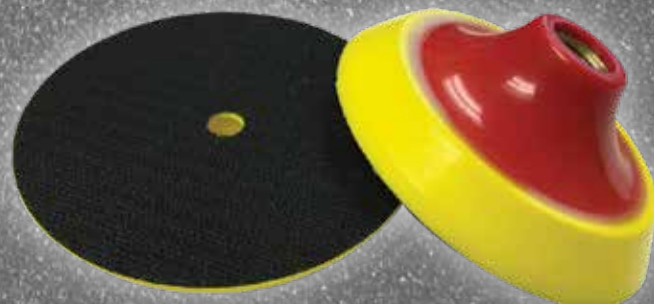

### Thick Yellow Foam Velcro Flexible Back Up Pads for Sandpaper

Weha Yellow Foam Velcro Flexible Back Up Pads are made to be used with Velcro backed silicon carbide sandpaper. The 5/8" thick yellow foam gives plenty of cushion for the sandpaper to roll over the edges and inside bowls, etc when sanding. The Yellow Foam Velcro Flexible Backer Pad can be compared to the Diskit flexible back up pads in quality and in performance.

- » 5/8-11 brass thread
- » Center water hole for wet use
- » Can be used wet or dry

Part #	Description
4440	4" x 5/8" Thick Yellow Foam Back Up Pad
4441	5" x 5/8" Thick Yellow Foam Back Up Pad

**OMA<sup>®</sup>**  
**SYSTEM**

***The First  
Digital Router  
Ever Built!***

**OMA Digispeed Electric Profiling Machine**

**Technical Features:**

- » 220 V Single or 3 Phase Power Required
- » Inner and external water feed
- » Variable speed: 0-6000 RPM
- » Dimensions: 20" x 12" x 16"
- » Light Weight at only 44 lbs.(22 Kg)
- » Strong 3 HP motor.

profile and polishing bits at any and all speeds they recommend.

2) Made with aircraft aluminum and steel, the OMA Taurus Profiling Machine's body is produced using the latest metallic technology for strength and durability. The outside cover is made with true fiberglass, not cheap plastic. these quality materials produce the lightest weight electric router with the strongest and most solid core in its class.

3) OMA Taurus Granite Router offers both Center Water Feed and External Water Feed

4) OMA Inter-changable Spindle Adapter system. The Taurus Granite Portable Profiling Machine comes with 3 spindle adapters that allow 100% complete flexibility in the type, style, and manufacture of router bit you choose to use

6) OMA Safety and Shock Prevention

7) 0-6000 RPM: Profiling does not require 10,000 or higher rpms.

By reducing the rpms, the Taurus runs extremely smooth, eliminating excess and unnecessary vibrations, creating perfect profiles without ripples or waves.

8) OMA Diamond Router Polishing Wheels Speed: Using the OMA Taurus with the OMAprofile and diamond polishing wheels, set of 6, you can process up to 20 feet per hour from profiling to complete polish.

9) Spindle can be adjusted up or down without the machine being on. This allows precise bit height adjustment, without getting wet.

Part#	Description
8000	OMA Digispeed Electric Profiling Machine

# OMA SYSTEM

## OMA Auctor CP 99 Hydraulic Router

The OMA CP99 Hydraulic Router is an Italian made machine designed for years of stone fabrication production. Powered by the OMA 4 HP hydraulic power unit which provides power by means of hydraulic fluid to the router. The OMA CP99 comes with an aqua planning base designed differently than its competitors. By having many water holes across the entire base, the CP99 aqua base creates an incredibly stable and steady platform. Even when you get to the corners and edges of the stone and part of the base accidentally comes off the stone. Also, because there is constant flow of water being pushed from the inside out, it helps to prevent pieces of stone from sliding under the router and create scratches. This compact and light weight router makes it easier to use, less user fatigue, and easy to move from one work table to another. The CP99 is a router that will provide many, many years of fabrication work.

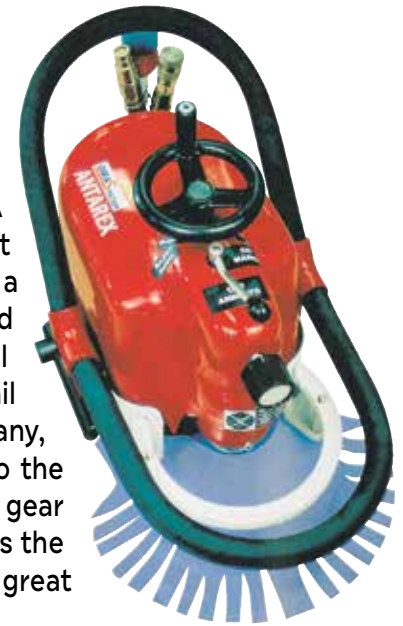

- » Variable speed: 0-7500 RPM
- » Dimensions: 20" x 12" x 16" (500 x 300 x 400mm)
- » Light Weight at only 35 lbs.(16 kg)
- » Frame made of aircraft aluminum and steel.
- » Cover is made of fiberglass, not plastic

## OMA Antarex Hydraulic Bowl Cutting Machine

The OMA Antarex Bowl Cutting machine is an hydraulic manual milling machine that uses OMA SYSTEM patent and it is unique in its field with no equivalent on the market. Even being a portable machine, it works at high levels in terms of high quality and precision performances, like a CNC machine! It completes the entire range of OMA SYSTEM production to solve each demand of shaped cuts. It can be used to drill pilot holes for faucets and cut sink bowls. This machine can be used free style or with a template in PVC or in plywood template material. The OMA uses the Antarex diamond cutter finger bit that spins is designed to run at 44.000 RPM. Thanks to the vertical cutter, you will able realize great craftworks highlighting the professionalism and the detail carefulness of the finished product. The OMA Antarex is a router that will provide many, many years of fabrication work. Inner Lubrication & cooling system: Before arriving to the machine, the water goes through a water/oil heat exchanger (patented) placed on the gear case that provides for the oil-dynamic system to cool. Arrived on the machine, it reaches the tool and guarantees a perfect lubrication. Working with a constant temperature assures great performances of the machine and extends the spindle, tools and bearings life.

- » Runs at 44,000 RPM
- » Dimensions: 20" x 12" x 16" (500 x 300 x 400mm).
- » Light Weight at only 35 lbs.(16 kg)
- » Frame made of aircraft aluminum and steel.
- » Cover is made of fiberglass, not plastic

## Antarex Finger Bit Diamond Cutter for OMA Antarex Bowl Router

The OMA Antarex Finger Bit Diamond Cutter for the OMA Antarex bowl router is screws into the spindle of the OMA Antarex. The OMA Antarex will cut through 2cm and 3cm stone in less than 6 minutes. This is allowing up to 10 bowls per hour of processing.

## 10' & 13' Automatic Dry Dust Collection Booth

**Filter Project Dry Dust Collector Booths are designed to trap 99.99% of dust from granite, marble, engineered stone, quartz, quartzite, and other airborne particles.**

- Traps 99.99% of airborne dust and particles
- Automatic self cleaning system
- Easy to dump dust collection drawers
- Easy ON/OFF buttons
- Easy to use control panel
- 13' has dual motors / 10' has single motor
- Comes with a 3 foot extension box for focused suction
- Comes fully assembled; just connect to power
- Financing available

**OSHA COMPLIANT**

## 10' & 13' A Water Wall Wet Dust Collection Booth

**Filter Project Wet Dust Collector Booths are designed to trap 90% of dust from granite, marble, engineered stone, quartz, quartzite and other airborne particles. Easy-to-operate.**

- Traps 90% of airborne dust and particles
- All aluminum, heavy duty
- Simple operation
- Financing available
- Requires 500 gallons of water

DESCRIPTION	SUCTION LENGTH	TOTAL LENGTH	WIDTH	HEIGHT	WEIGHT	POWER 220 3 PHASE	DUST EFFECTIVENESS	NOISE LEVEL DECIBELS
10 FT 3 METER	115"	128"	38"	94"	704 lbs	7 hp	90%	74 dB*
13 FT 4 METER	155"	179"	38"	94"	913 lbs	8 hp	90%	74 dB*

\*Noise levels: 60 dB - Normal Conversation; 70 dB - Toilet Flushing/Vacuum Cleaner; 80 dB - Heavy Traffic/Noisy Restaurant

TEC711	Filter Project 10 ft (3 meter) Water Suction Wall
TEC712	Filter Project 13 ft (4 meter) Water Suction Wall

## Mobile Dry Dust Collector

- Length: 28"
- Width: 40"
- Height: 88 1/2"
- Weight: 176 lbs
- Suction Power: 63,566 CF/h (1800 m3/h)
- 2 HP Motor
- Voltage: 220 v 1 phase. 11.5 amp
- 102" x 6" Diameter Arm
- 4 Swivel wheels
- 3 110 Power outlets on front.

Part #	Description
TEC740	Filter Project Mobile Dust Extractor

## Dry Dust Collector Arm Attachment for Wet & Dry Collectors

**Special Order with purchase of Wet or Dry Collector**

# Sludge Dehydrator 5 DS-50

- Multiple Sludge Dehydrator will filter granite, marble, quartz, concrete, ES, cultured marble and other sludge and slurry materials.
- Made of premium grade Stainless Steel AISI304 for years and years of use without rust or deterioration.
- 5 bag valve system. Each valve has a shut off valve.
- Saves time and \$\$\$\$. No shoveling and scooping out sludge and mud!
- Top tank capacity of 95 gallons
- Strong, durable 1 HP pump

- Length: 103" (2600mm)
- Width: 20" (50mm)
- Height: 79" (2000mm)
- Weight: 308 lbs (140 kg)
- Tank Capacity: 99 Gal (450 Ltr)
- Pump Motor: 1 HP (.75Kw)
- Power Requirement: 220 Single Phase

Also Available by Special Order  
Filter Project Sludge Dehydrator 4 Bag with pump

Part #	Description
TEC702	Filter Project Sludge Dehydrator 4 Bag with Pump DS-40
TEC703	Filter Project Sludge Dehydrator 5 Bag with Pump DS-50
7240032	Sludge Dehydrator Waste Bags

## Compact Water Treatment Plants

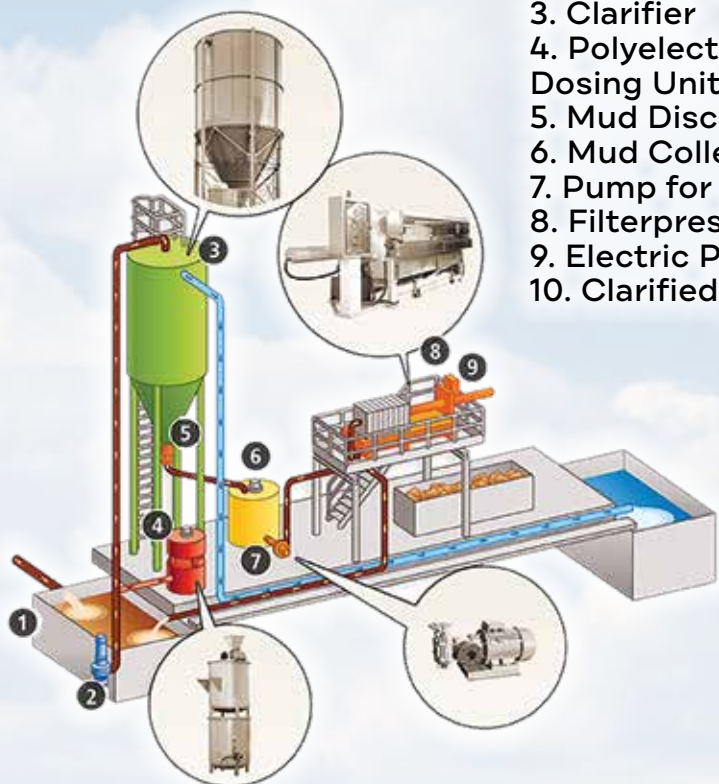

The Filter Project Compact Water Treatment plant's size allows the installation of the plant as inside as well as outside of the factory, ensuring a complete functioning like a the traditional system.

The plant is composed of a vertical clarifier, a submersible pump, a safety manual shutter and a pneumatic valve, a flocculant unit, a mud storage tank, a pneumatic pump for the feeding of the filterpress, an automatic filterpress and a electrical control panel with PLC for the management of the plant. As an alternative to the filterpress, for small quantity of mud, we can propose the plant with filtering bag and monoscrew pump for mud extraction.

The Filter Project Compact Water Treatment Plants are made out of either hot galvanized or stainless steel AISI 304.

### COMPONENTS

1. Collecting Well
2. Submersible Pump
3. Clarifier
4. Polyelectrolyte Preparation and Dosing Unit
5. Mud Discharge Pneumatic Valve
6. Mud Collecting Tank
7. Pump for Filterpress Valve
8. Filterpress
9. Electric Panel
10. Clarified Water Stocking Tank

Available by special order

Part #	Description
TEC770	Filter Project Compact Plant 250 Ltr per min / 66 GPM
TEC771	Filter Project Compact Plant 500 Ltr per min / 132 GPM
TEC772	Filter Project Compact Plant 750 Ltr per min / 198 GPM
TEC773	Filter Project Compact Plant 1000 Ltr per min / 264 GPM

## 132 GPM (500 LPM) Water Plant

The 132 GPM Compact Water Recycling System installs inside or outside of the processing facility. It can be installed inside the fabrication shop because of its compact size. The 132 GPM Stone Water Recycling System functions like a traditional system and is available with or without the optional accessories. For example, this compact slurry filtration machine for fabricating granite is available in galvanized carbon steel or stainless steel.

### **The components that are included:**

- Hot-galvanized or Stainless Steel AISI 304
- 3,434 Gallon Clarifier
- 4" Safety Manual Shutter
- 4" Pneumatic Valve
- 140 Gallon Flocculant Unit
- Mixing Slurry Tank
- Filterpress Diaphragm Pump
- Mud Extraction Valve
- AS300/8P Automatic Filterpress
- Submerged Pump
- Electrical Control Panel

TEC771	132 GPM Compact Water Recycling System

## 198 GPM (750 LPM) Water Plant

The 198 GPM Compact Water Recycling System installs inside or outside of the processing facility. It can be installed inside the fabrication shop because of its compact size. The 198 GPM Stone Water Recycling System functions like a traditional system and is available with or without the optional accessories. For example, this compact slurry filtration machine for fabricating granite is available in galvanized carbon steel or stainless steel.

### **The components that are included:**

- Hot-galvanized or Stainless Steel AISI 304
- 4,755 Gallon Clarifier
- 4" Safety Manual Shutter
- 4" Pneumatic Valve
- 140 Gallon Flocculant Unit
- Mixing Slurry Tank
- Filterpress Diaphragm Pump
- Mud Extraction Valve
- AS400/8P Automatic Filterpress
- Submerged Pump
- Electrical Control Panel

Part #	Description
TEC772	198 GPM Compact Water Recycling System

All Filter Project clarification plants are built using sturdy, first quality materials and ground breaking techniques. Water clarification plants play an ever-increasing role in running a productive and profitable stone fabrication or processing enterprise. ## **66 GPM (250 LPM) Lamellar Water Plant**

The Lamellar 250 Water Processing Plant is a small sized stone water recycling system that runs at 66 GPM. It is designed to process and clarify waste water produced by a stone fabricators without flocculant. This 66 GPM Water Plant is a stone water clarification system used for indoor installation as well as outdoor installation.

Part #	Description
TEC754	66 GPM Lamellar Plant

### **Specifications:**

- **66 Gallons per Minute**
- **1320 Gallon Vertical Clarifier**
- **140 Gallon Flocculant Unit**
- **26 Gallon Coagulant Unit**
- **Submersible Pump**
- **4 HP Relaunching Pump**
- **Sludge Dehydrator Bag System**
- **Wavy Dividers**
- **35 Cubic Foot Filtering Bag Volume**
- **Double chemical system - Coagulant / Flocculant**

Lamellar Pack - Wavy Dividers

Relaunching Pump

Flocculant Unit

**What makes Filter Project  
a better choice than other  
water clarifier systems?**

- **Double chemical system for cleaner water**
- **Siemens parts**
- **Pedrollo pumps/motors**
- **Items stocked in US**
- **Free remote service available**
- **US based technician for better customer service**

# 105 GPM (400 LPM) Lamellar Water Plant

The Lamellar 400 Water Processing Plant is a small sized stone water recycling system that runs at 66 GPM. It is designed to process and clarify waste water produced by a stone fabricators without flocculant. This 105 GPM Water Plant is a stone water clarification system used for indoor installation as well as outdoor installation.

## Specifications:

- 105 Gallons per Minute
- 1849 Gallon Clarifier
- 140 Gallon Flocculant Unit
- 26 Gallon Coagulant Unit
- Submersible Pump
- 5 1/2 HP Relaunching Pump
- Dual Sludge Dehydrator Bag System
- Wavy Dividers
- 35 Cubic Foot Filtering Bag Volume

Part #	Description
TEC756	105 GPM Lamellar Plant

Re-usable in the shop!

Control Panel

Sludge Dehydrator Bag System

Part #	Description
TEC787	5 Gal Flocculent P817E
TEC788	5 Gal Coagulant P891L
TEC750	Sludge Bags
